NOTICE OF INTENT TO ADOPT
A MITIGATED NEGATIVE DECLARATION**

FRANKLIN D. ROOSEVELT PARK REGIONAL STORMWATER CAPTURE PROJECT

In accordance with Section 15072 of the California Environmental Quality Act Guidelines, this notice is to inform public agencies, County residents, and the general public that the County of Los Angeles Department of Public Works (LACDPW) has completed an Initial Study/Mitigated Negative Declaration (IS/MND) for the following proposed project:

Project Title: Franklin D. Roosevelt Park Regional Stormwater Capture Project (proposed project)

Project Description: LACDPW proposes several improvements to the Park to increase water conservation, improve water quality, and provide additional recreation, education, and outreach benefits to Park visitors. The Park encompasses approximately 24 acres and lies adjacent to the Glen Avenue Drainage System that discharges into Compton Creek, which is a tributary of the Los Angeles River, both of which are water quality impaired. LACDPW is proposing to divert dry- and wet-weather flows from the Glen Avenue Drainage System and to provide pre-treatment of water for infiltration to the groundwater basin. The proposed project would achieve multiple benefits, including water quality improvements, water conservation, Park facility upgrades, and education and outreach signage.

Construction is anticipated to begin in June 2018 and last for approximately 7 months.

Project Location: The project site is located within the unincorporated area of Florence-Firestone in Los Angeles County at 7600 Graham Ave., Los Angeles, CA 90001 and is approximately 24.34 acres. The project site is located near the cities of Huntington Park, Los Angeles, and South Gate. See Project Location Map (over).

Public Review Period: The IS/MND is being circulated for a 30-day public review. The review period will begin December 21, 2017, and will end January 20, 2018.
