Dear Gentleman:

United Pumping Service, Inc. appreciates the opportunity to submit our bid to provide “As-Needed Emergency Removal of Hazardous Material”. United understands the work to be accomplished. The individuals authorized to sign and make representations:

1. Eduardo Perry, Jr. – Secretary/Treasurer
2. Daniel C. Perry – Vice President
3. Robert Pina – Sales Manager

14000 E. Valley Blvd.
City of Industry, CA 91746
Ph: 626/ 961-9326 Fax: 626/ 336-7734

United Pumping Service, Inc. is a family owned and operated minority business enterprise (MBE) specializing in servicing the hazardous and non-hazardous waste needs of private and public sector clients. Founded in 1970 by Eduardo T. Perry, United Pumping Service, Inc. is one of the few hazardous waste transporters operating in the greater Los Angeles District and Inland Empire that provides **FULL SERVICE MANAGEMENT and TRANSPORTATION** of your hazardous waste. United Pumping Service, Inc. is among the **PIONEERS** in hazardous waste transportation. Throughout our years in business, we have greatly broaden our capabilities to match customer requirements. Remedial capabilities including implementing the underground storage tank program, facility decontamination, building demolition, soil excavations, with applying industry technologies for practical soil and ground water remediation, are a few examples of our continued growth and our commitment in providing the very best **FULL SERVICE MANAGEMENT** in the industry.

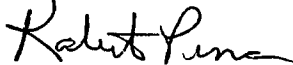

Being the **PRIMARY** regional state of California Department of Transportation **Emergency Spill Response contractor for CalTrans District 7**, a licensed general

engineering contractor with the proper certifications for hazardous substance removal and remedial action and asbestos, and a demolition contractor; United Pumping Service, Inc. is quite capable and able to resolve any situation in the event of an unfortunate incident while in transit or on site. Our highly trained professional service staff are CPR and 40 hour trained, and are medically monitored in accordance with O.S.H.A. Title 29 CFR 1910.120 to conduct tasks which are considered to be handling or exposure to hazardous materials, substance, or waste.

Our current list of clientele under contract consists of a who's who in aerospace and heavy waste generator's. You will find in reviewing the enclosed information on United Pumping's complete capacity of services, that U.P.S. is more than capable in being your specialty contractor or subcontractor, able to perform all necessary services efficiently and environmentally sound, as well as fulfill MBE requirement goals.

Please give me a call if you have any questions. We look forward to working with you on your environmental needs.

Sincerely,

Robert Pina
Sales Manager

REQUEST FOR PROPOSALS - ADDENDUM 1 AS-NEEDED EMERGENCY REMOVAL OF HAZARDOUS MATERIAL

Thank you for attending our mandatory Proposers' Conference for As-Needed Emergency Removal of Hazardous Material on Thursday, October 27, 2005.

As requested, below is the total amount paid to date to our current contractors for the current contract year (December 31, 2004, through December 30, 2005):

Ocean Blue Environmental Services, Inc.	\$110,000
United Pumping Service, Inc.	\$ 0

We have made the following additions, changes (bold), and deletions to the Request for Proposals:

1. Part I, Section 2.A.12, Proposal Format and Content Requirements (page 1.8), is added to read:

Submit Proposer's current published rate list, indicating charges for labor, equipment, and materials used for hazardous material/waste pickup.

2. Sample Agreement, seventh paragraph (page 2), is changed to read:

Any equipment and/or materials used for the work for which a price is not quoted on Form PW-2, Schedule of Prices, shall be billed according to the CONTRACTOR'S published rate list, which shall be valid for the first one-year term of this Contract. The CONTRACTOR shall provide their published rate list annually at the time of Contract renewal, indicating charges for labor, equipment, and materials used for hazardous material/waste pickup. ~~Any necessary equipment and/or materials not listed under items 1, 2, and 3 on Form PW-2, Schedule of Prices, shall be billed according to the CONTRACTOR'S published rate list.~~

Also, as requested, enclosed is a list of Proposers' Conference Attendees (Enclosure A).

November 1, 2005
Page 2

Please remember that sealed proposals for this service will be received by Public Works
Cashier up to 5:30 p.m., Thursday, November 10, 2005.

If you have questions concerning the above information, please call Ms. Erin Lomas at
(626) 458-4049, Monday through Thursday, 7 a.m. to 5:45 p.m.

Very truly yours,

DONALD L. WOLFE
Director of Public Works

Qualifying Experience

United Pumping Service, Inc is a California based Corporation. United is a Minority Owned Business certified as a MBE by the County of Los Angeles, City of Los Angeles, and MTA. United Pumping Service is a fully qualified environmental remediation, transportation, and emergency spill responder contractor.

United maintains an impressive fleet of trucks, roll off containers and support equipment to handle day-to-day removal requests and emergency spill response situations. Being the primary Regional State of California Department of Transportation Emergency response Contractor in District Seven, United Pumping performed the majority of emergency spill cleanups. We are rated number 1 both in response time and lowest cost overall. Our full service company can assure clients quality service in the areas of transportation, disposal, storm drain filter insert and storm drain cleaning, site remediation, demolition, plant closures, decontamination, tank cleaning and removal and various other environmental needs.

With a background of 35 years in hazardous waste removal/transportation and more than 16 years in solving remedial action problems for clients. United brings an outstanding level of technical experience, physical resources, and practical know-how to each job.

United Pumping has performed the following list of services:

- Entire Hazardous waste profile, management, transportation, and disposal
- Environmental investigations and remediation
- Profiled, loaded and transported PCB contaminated transformers/ballasts
- CCTV Storm drain cleaning
- Assisted in UST tank cleaning and removal
- Emergency spill response on various pumping and pick up of hazardous waste
- Pond sedimentation
- Demucking (pond and rivers at Disneyland site)
- Kitchen grease trap pumping, removal and cleaning
- Marina sediment removal project- United Pumping Service supplied sediment removal, labor, dewatering bins and transportation.

United Pumping Service, Inc has provided Emergency Spill Response services for over 20 years on a daily basis for Safety Kleen, City of Los Angeles, State of California Cal Transportation Southern California Region 7, MTA, Metrolink, as well as a vast extensive list of both public and private companies. These contracts stipulate a call back and on site response within 2 hours of initial call.

Proposal for "As-Needed Emergency Removal of Hazardous Material"

Due Thursday, November 10, 2005 5:30 pm

Five Relevant Project Experience

1. Household Hazardous Waste Pick up and Transportation

City of Glendale
780 Flower Street
Glendale, CA
2002- Present

Contract Amount: \$200,000.

Brief Description: Profile, & manifest all waste streams for Household Hazardous and Non-Hazardous Waste for the City of Glendale Household round-ups. United Pumping profiles all waste to proper disposal facility. Emergency response associated with City of Glendale Fire Department recommendation.

Contract Amount: \$100,000.

City of Glendale Department of Water & Power

Transformer and electrical equipment contaminated with PCB's are profiled, weighed and transported to proper disposal facility. Pick up all telephone poles and transport to disposal facility.

2. Storm Drain Cleaning- San Diego International Airport- Port of San Diego

Riha Construction- Subcontractor for Riha Construction

Contract amount: \$140,000.00

Brief Description of Environmental Remediation Effort:

Confined space cleaning of storm drains throughout San Diego Airport- Lindberg Field. Dewatered all debris, soil, and rocks and transported all waste to proper disposal facility. Upon completion of cleaning storm drains United Pumping performed CCTV taping to verify cleaning. Riha Construction repaired storm drains for contract.

Contact: Ken Riha 619 469-2177

April 2002- August 2002

2. Field Emergency Response

City of Los Angeles- Safety Kleen Contract Type: Time & Materials

Period of Performance: 1997- to date

Current Contract/Task Value: \$330,000

Brief Description of Environmental Remediation effort:

United Pumping Service, Inc has performed emergency response service for spills and waste removal. Service includes waste identification, segregation, remediation and lab packaging of abandoned waste, vacuum truck service for bulk liquids and roll off containment for solids. Traffic incidents where waste fuels are leaking on both surface and freeways and highways.

County of Los Angeles- Department of Public Works
Proposal for "As-Needed Emergency Removal of Hazardous Material"

Due Thursday, November 10, 2005 5:30 pm

Management Relevance: United has managed and performed Emergency Response Service at multiple sites at the concurrently. United consistently deals with all environmental agencies including, City Fire Department, Dept. of Health Services, Fish and Game, AWMD, EPA, OSHA.

3. Manhole Maintenance, Emergency Response Fleet Management

Pacific Bell- Contract Type: Time & Material

Period of Performance 1986- to date

Current Contract/Task Value- \$330,000

Brief Description of Environmental Remediation effort:

United Pumping Service, Inc provides complete industrial cleaning and waste removal of Pacific Bell's manholes. This service includes confined space entry, pressure washing and steam cleaning, jet wash purging of connecting conduit from manhole to manhole, emergency response, pressure wash, and steam of hoist pits and clarifiers located at fleet sites throughout California.

Management Relevance: Emergency response critical to Pacific Bell being able to access faulty equipment on down grids (telephone failure) United has maintained and managed entire California Fleet Management disposal needs assisting Pacific Bell on compliance issues.

4. Hazardous Waste Transportation, soil excavation, tank cleaning, emergency response.

Metropolitan Transportation Authority/ CH2M Hill Time & Material

Period of Performance 1994- to date

Current Contract/ Task Value-\$140,000.

Brief Description of Environmental Remediation effort:

United Pumping Service, Inc performed hazardous waste transportation for MTA Green. The service has expanded from simple vacuum truck service to excavation of 400 tons of contaminated soil. Confined space entry to clean 6/21K gallon tanks full of sediment. Removal of 40 yards of sludge from tunnel construction 80 feet below grade. De-contaminates and removed above ground treatment system including removal of all connecting piping and clarifiers. Emergency response of hazardous waste spills.

Management Relevance: Consolidated soil drums and bulk liquids to provide economical disposal cost of 100's of drums. Provided entire labor force and vactor equipment to remove sludge/mud from flooring of Greenline tunnel 1 month work of tunnel down time done in 3 days providing MTA minimal downtime and tremendous cost savings.

County of Los Angeles- Department of Public Works
Proposal for "As-Needed Emergency Removal of Hazardous Material"

Due Thursday, November 10, 2005 5:30 pm

First it is important that we state that United Pumping Service, Inc. has several emergency response units equipped and ready to go at all times. These units are both located at our City of Industry Terminal and driven in the field by emergency response supervisors. This enables our personnel to literally walk up to the response unit with their gear bag and drive off to the spill location. At the end of each workday and on weekends and holidays, all emergency response supervisors take response units home to ensure rapid response.

Each emergency response unit is equipped with an assortment of drums (steel, poly, 30 gal, 55 gal, over packs, etc.) labels, manifests, L.D.R.'s, a pallet of absorbent, hand tools (brooms, shovels, etc.) hazcat kit, P.P.E., booms, pads, lighting, confined space equipment and sampling equipment and supplies.

Based upon our experience as the current subcontractor performing this work for the City of Los Angeles the equipment and materials listed meet the requirements of approximately 95% of the City of Los Angeles's spills. When additional items (pressure washers, bobcat loaders, etc.) are needed, the crew is able to quickly add the items to their truck and get under way.

Although our emergency response units are generally equipped with much more equipment and materials than required, the customer is only charged for items used.

United Pumping Service, Inc is capable of picking up all kinds of spills, including both liquids and solids, and we are able to mobilize this equipment and arrive at the scene within two hours. United Pumping Service, Inc is available 24 hours per day, 365 days per year, for emergency response. We also have employees that are accessible by pager and will return calls promptly (within 15 minutes). United Pumping Services, Inc also has traffic control equipment for every type of emergency situation.

Due Thursday, November 10, 2005 5:30 pm

4. TRAINING AND SAFETY PROGRAM

United Pumping has extensive health and safety experience in many working environments. The company's health and safety program is managed by well-trained, experienced, certified personnel and meets the requirements of Title 8, California Code of Regulations.

United Pumping Service, Inc. (United) is proud of our exceptional compliance record in employee safety and in the management of hazardous waste/materials. United staff maintains and works from an extensive federal and state regulatory database in identifying special requirements and delineating the various options available under current regulations pertaining to remediation and transportation of hazardous waste/materials.

United was awarded a certificate of achievement from the California Highway Patrol for maintaining a Consecutive Satisfactory Rating since 1990. This rating is related to operational terminal biennial inspection for our compliance with applicable laws and regulations relating to motor carrier safety. We also are proud of our consecutive Satisfactory Rating with the United States Department of Transportation.

Every project we work on involves dangerous chemicals that are not only dangerous to our employees but could damage the environment and/or the public safety. Therefore, any injured worker is required to be seen by the Company Doctor to be evaluated for chemical exposure. Additionally, all employees must participate in the company drug and alcohol-screening program. You can rest assured that when one of our trucks and/or crews are handling your chemicals, they are drug free, experienced, and in fit condition for the work.

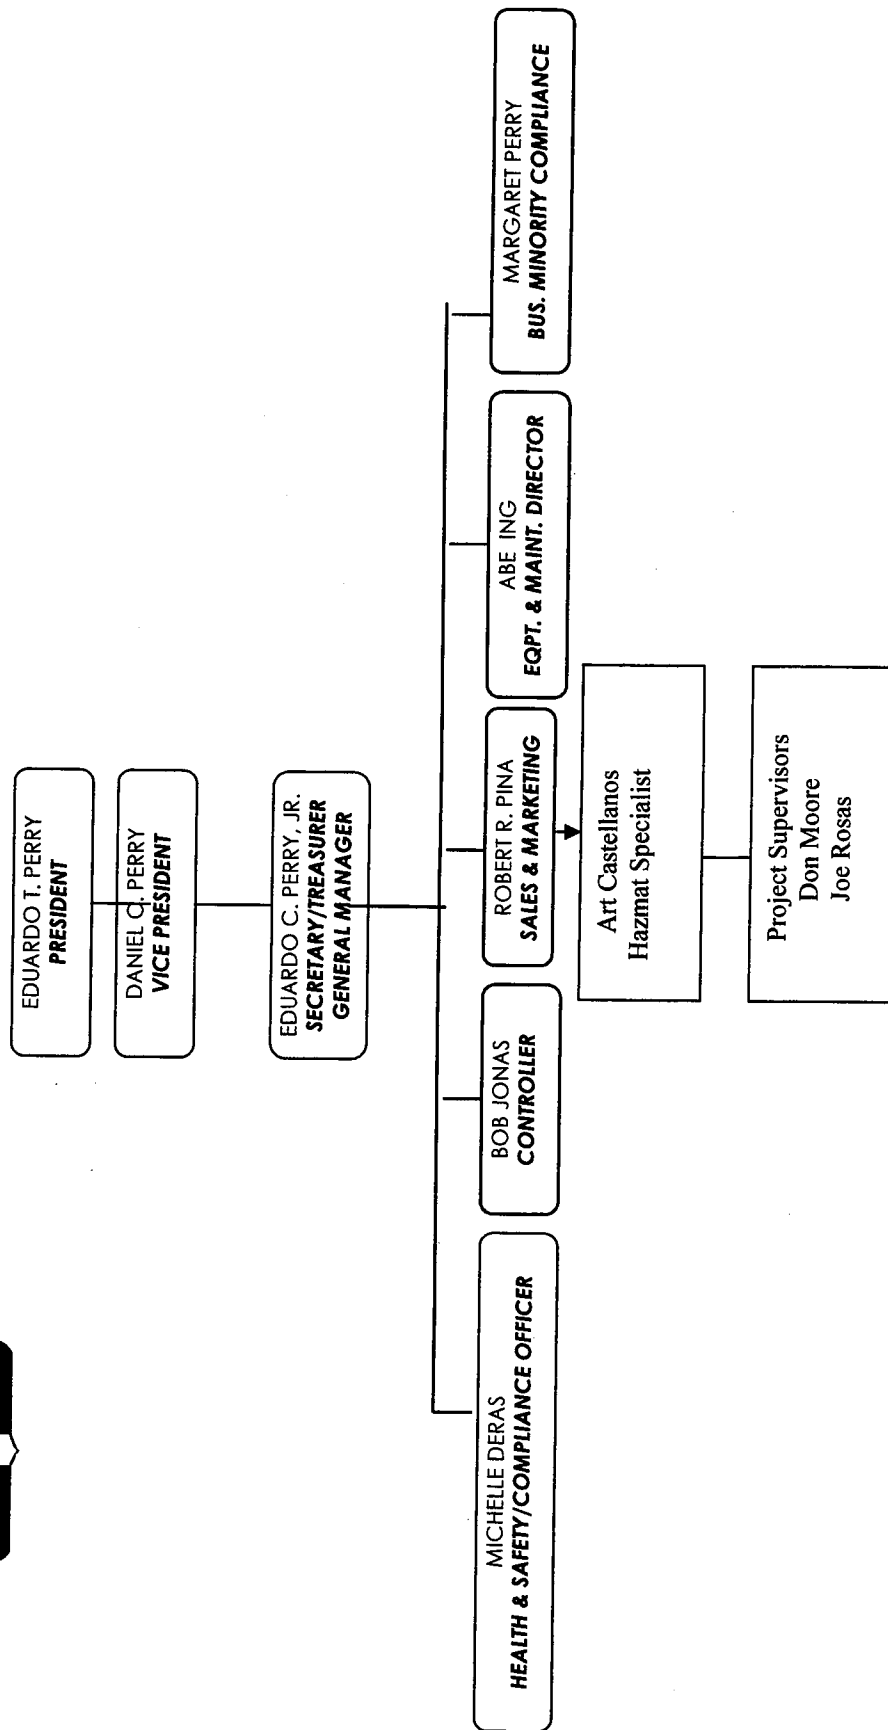

We feel that there are many factors involved in a successful safety program. At U.P.S. we have been concentrating on three main areas;

1. Specialized training for every driver and technician.
2. Experienced Personnel.
3. Well-maintained equipment.

We are committed to an on-going successful safety program and continuously strive for improved results.

UNITED PUMPING SERVICE, INC.

United Pumping Service, Inc.

Eduardo Perry, Jr.
General Manager
26 Years Experience

A.S. 1976, Building Technology
B.A. 1979, Accounting

Management Experience

Mr. Perry's experience as a remediation contract manager has included projects throughout California. He is the company's qualifying responsible managing employee for its A-General Engineering License. Mr. Perry also maintains hazardous substances removal and remedial actions certifications and an asbestos abatement certification. Mr. Perry has overseen site remediation projects including production line decontamination /demolition and underground tank removals. Mr. Perry has supervised such projects at aerospace facilities throughout Southern California. He was primary responder on hazardous materials spills for Cal Trans, identifying and removing various chemical releases. Mr. Perry has overseen the development of specialty transportation equipment allowing greater flexibility in delivering small quantity shipments, which has resulted in increased efficiency and lower client costs. Furthermore, Mr. Perry has been responsible for oversight of all company operations, including all project management personnel. He also manages the company's legal and liability concerns. Likewise, company fiscal accounting systems including cost estimating are under Mr. Perry's control.

Recently Completed Projects

1. He has overseen all tank removal and/or replacement projects both above and below ground. He has performed decontamination/remediation projects from start to finish at Allied Signal, General Dynamics, and Lockheed facilities.

Career Highlights

- o Project Manager - Cal Trans, crude oil tanker spill cleanup of 2 miles of channel. Around the clock operation, \$300K Los Angeles, CA
- o Project Manager - Cal Trans, Century Freeway Project, site excavation, underground tank and contaminated soil removal, \$1 million plus.
- o General Manager - Firm selected as Latin Business Association, established Business Of The Year 1996.

United Pumping Service, Inc.

Eduardo Tavaréz Perry, Sr. - President

Eduardo T. Perry, Sr. began his working career as a field laborer working long hard hours, seven days a week picking crops.

This Texan - Born in Presidio, Texas left his home state and moved to California at the age of fifteen, taking menial jobs from washing cars to a general laborer in construction. Eduardo worked at a trucking firm and eventually became manager of that company. It was at that trucking company that Eduardo's ambition to own his own business began to take shape.

With the support of his young wife, Margaret, who he met in California and coincidentally was also from Presidio, Texas they agreed to purchase a used pump truck and establish their own business, United Pumping Service, the year was 1970. First year sales was under 5,000 dollars but Eduardo's early working years instilled a work ethic of tremendous value and learning experience as the second year had explosive growth to over 42,000 in sales. As Eduardo Perry's reputation for high quality responsive service began to grow, so did United Pumping.

Eduardo Perry's Company, United Pumping Service, maintains the same ranch hand attitude today, providing the customer with the same high quality responsive service that the company was built on, and has grown from its modest beginning of under 5,000 to over 12 million dollars in sales revenue. Eduardo T. Perry, Sr. stands as President of one of the most reputable and recognized hazardous waste transporters in the State of California.

Eduardo T. Perry, Sr. is now semi-retired, however he still continues to assist in the daily operations of the company, which is now managed by his son, Eduardo C. Perry, Jr.

United Pumping Service, Inc.

Margaret Perry - Vice President Sales & Marketing

Margaret Perry joined the family business 15 years ago and acts as Vice President Sales & Marketing. She oversees the company's sales program and maintains all minority/disadvantage business enterprise certifications.

United Pumping Service, Inc.

Robert Pina
Senior Project Manager
21 Years Experience
U.P.S. Grade: Senior Level

Construction Experience

Mr. Piña has managed several projects for both government and private sector clients. He has managed the remedial activities for clean-up of contaminated soil, underground storage tanks and ground water contamination. His responsibility to direct and oversee his subordinates in the proper handling and disposition of hazardous and non hazardous materials and waste. Other responsibilities include bid review, research, project feasibility, and project cost estimating.

Completed Project

- * Project Manager - BOC Gases, City of Industry, California. Decontaminated and demolition of (3) three cooling towers, removed all associated wood, piping, concrete pits, and properly disposed of materials at designated disposal facilities.
- * Project Manager - Confidential Aerospace Firm, Los Angeles, County, California. Conducted closure tasks decontamination of processing line consisting of forty (40) process tanks, decon 2,500 linear feet of associated piping, properly disposed of all hazardous waste.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County, California. Removal of UST, sample soil, backfill, and compact.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County, California. Removal of UST, sample soil, backfill, and compact.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County. Managed decontamination of process line. (Chemical types: acid, cyanides, alkalines) Pressure wash above ground tanks piping characterize, profile waste for transportation and disposal.
- * Senior Project Manager - Mitchell Rubber, City of Industry, California. Oversaw cleanup of non hazardous waste from fire damage interfaced with owners and County Fire to properly clean up and dispose of wastes.

Management Experience

Mr. Perry's development as a Senior Project Manager include; research, bid review, project feasibility, and project cost estimating. His extensive experience enables him to identify tasks, determine sub-tasks and develop efficient methodology for the successful completion of projects. Mr. Perry's 24 hour emergency spill response experience and 40 hour OSHA training has enabled him to quickly determine remediation project requirements. He is a hands-on / can-do" manager of remedial actions providing services to governmental agencies and private sector companies within the following industries; which include the aerospace, circuit board manufacturing, auto manufacturing, metal finishing, chemical manufacturing and the transportation. He is involved daily with tasks for 24 hour emergency response, personnel and equipment dispatching. He directs the cleaning and removal for the above ground and below ground storage and process tanks with their attendant overhead and below ground pipe removal. He administers the demolition, excavation, surface decontamination, hazardous waste identification, handling, segregation, storage, characterization, profiling, and transportation for disposal of waste streams. He adheres to the guidelines set forth in OSHA Title 29, CFR 1910.120, 29 CFR, 40 CFR, and 49 CFR while conducting tasks which are considered to be handling of exposed to hazardous materials, substances, and waste.

Recently Completed Projects

1. Superintendent - Los Angeles Civil Unrest Clean-up, Los Angeles, CA.. The project consisted of approximately 150 burned buildings throughout Los Angeles County. Demolition Decontamination, manifesting, transportation and disposal at approved facilities. Demolition, decontamination, manifesting, transportation and disposal at approved facilities.
2. Superintendent - Ford Assembly Plant, Milpitas, CA. The facility was 2 million square feet. Demolition, decontamination, excavation, characterization of waste for transportation and appropriate disposal.
3. Superintendent - Henry Soss Co., Los Angeles, CA./ A subsidiary of Yale Security, Inc. The facility was a 40,000 square foot hinge manufacturing and plating facility with 10 different areas. 90 above ground process & treatment tanks, approximately 300 linear feet of ventilation and scrubbing system ducting, approximately 5000 linear feet of process piping, one roof mounting ventilation scrubber, two metal dust collecting cyclones, and approximately 1000 linear feet of above head conveyance system.

4. Superintendent - Pacific Southwest Airmotive Facility Closure, San Diego, CA. The facility was a 78,000 square foot jet engine rebuilding and test facility with 66 different areas, 60 process tanks up to 4800 gallon capacity, 4 underground storage tanks up to 10,000 gallon capacity, approximately 3000 linear feet of above head and below grade ventilation and scrubbing system ducting up to 48" diameters, 175' of underground ventilation tunnel, two 45,000 cubic feet per minute and one 25,000 cubic feet per minute roof mounted ventilation scrubbers, and approximately 15,000 linear feet of process piping.

Career Highlights

- o Senior Project Manager - Orange County River spill clean-up Senior Project Manager - Southern Pacific derailment fuel spill clean-up involving remedial action for hydrocarbon contaminated soil.
- o Senior Project Manager - Cal Trans Newhall, CA preliminary site assessment, installed boring for monitoring wells, excavated gasoline contaminated soil, and transported to an approved disposal facility.
- o Senior Project Manager - Confidential Client, Anaheim, CA Hazcat (tm) 20,000 drums for identification, transporting and disposal at approved facilities.
- o Senior Project Manager - Bonanza Aluminum, Ontario, CA.. Underground clarifier removal, contaminated with corrosive materials, and plant decontamination.
- o Senior Project Manager - Hurst Graphics, Glendale, CA. Petroleum contaminated soil excavation, transportation and disposal at approved disposal facility.

United Pumping Service, Inc.

Don Moore

Field Supervisor / Emergency Responder UPS Emergency Response
8 Years Experience UPS ER Team
22 Years Experience in Chemical Field
Specialize in hazardous waste water pre-treatment of compound chemicals

Certified Instructor OSHA-SARA (40 hour 29 CFR 1910-120 Hazardous Waste Operations and Emergency Response)
Certified Emergency Responder for Derailments
Hazcat Chemical Identification Course/Haztech Systems
Certified in Self-Contained Breathing Apparatus/Confined Space Entry
CPR & First Aid
Specialize in Waste Water Pre-treatment, acids, and alkalines
Customer service and emergency response supervisor for 10 years with UPS ER team
Certified Instructor OSHA-SARA (40 hour 29 CFR 1910-120 Hazardous Waste Operations and Emergency Response)
Certified emergency responder for derailments Hazcat chemical Identification course/Haztech system
Certified in self-contained breathing apparatus/confined space entry
CPR & First Aid
Certified for Microsoft Excel, Power Point at Glendale College

Previous experience

TRW Cinch Graphic – 1976-1979

Position: Chemical Maintenance: Mixing acids, solvents, maintaining pumps and filter systems, operating waste water treatment systems, constructing new plumbing systems for water systems.

Crown City Plating, Inc. 1979

Temple City, Ca.

Position: Waste Treatment Operator: Maintain records of all water treatment plant, also operated forklift. (Forklift Safety I).

Printed Circuit Products Inc./Bison Technical 1979-1983
Industry, Ca.

Position: Plant Supervisor: Maintained all production records, supervised all chemical maintenance modifications, operated all pre-treatment, and waste water treatment procedures, maintained all chemical records, inventories, pumps, filter systems also limited electrical and plumbing duties. Operated forklift.

Don Moore

Page 2

Benchmark Technology 1984-1989

Industry, Ca.

Position: Chemical Maintenance Sr. II Leadman: Supervised general maintenance of all chemical plating tanks, mixing and blending acids and alkaline solutions, maintained chemical inventory of all incoming and outgoing chemicals, (Waste disposal). Managed water treatment for industrial stream, maintained all files of on site chemicals. Improvised safety training and use of MSDS. Maintained all pumps, filter systems and new construction of chemical areas.

Professional experience:

Supervise emergency response teams in the clean up of all liquid and solid hazardous material spills, including contaminated soil remediation, and removal of above ground and underground storage tanks. Identify, consolidate, manifest and profile hazardous waste for transportation and disposal. Investigate unknown chemical dumping, perform field analysis. Do estimating and cost quotations, operate heavy equipment and maintain state enforced regulatory safety conditions.

Storm Water Division, Project Manager

Worked on the 1998 CalTrans storm drain inspection and cleaning project. Directing and supervising crews on safety aspects of traffic control and confined space entry. Coordinate the workflow and maintain records for the state.

Sales and Marketing of company services through the Internet.

United Pumping Service, Inc.

Joe Rosas

Relevant Work Experience:

United Pumping Service, Inc. Hazmat Technician/Supervisor
14000 E. Valley Blvd., Industry, Ca. 91746 (626) 961-9326
September 1996- Present

Training Profile

Certified OSHA-SARA 1910.120 Hazardous Waste Operation Training 40 hour and 8 hour refresher: Hazardous Emergency Response, Site Characteristics, Regulatory Composition, Compatibility & Storage of Chemicals, Hazardous Classification of chemicals, Principles of Industrial Hygiene, PPE, Medical Surveillance, Site Control, Safety Plans, Instruments, Engineering/Administrative Controls, Confined Space, Decon, Site Emergency, Transportation and Disposal.

Hazardous Endorsement

CPR& First Aid

Respirator Fit-Test Training

DOT Training

HAZCAT Training

Forklift Training

Scope of Responsibilities:

Supervises hazardous materials cleanup crews handling various materials, tank cleaning, stabilization, solidification, lab packing, demolition crew on plant closures, and emergency spill response. Package and transport hazardous chemicals and materials.

Proven experience in operating response equipment and performing maintenance and the set up of that equipment.

CalTrans, LA County Fire, LA County ISD, Pacific Bell, LA County Parks & Recreations
Hazmat Emergency Response Technician and Supervisor: Supervise and clean up chemical spills and clean chemical tanks. Lab Pack waste chemicals and package bulk waste chemicals in containers for proper disposal. Inspect and clean storm water drains. Enter and clean storm water pump houses under confined space procedures. Manifest, package, label and transport chemical drums for proper disposal. Conduct ground water/soil sampling, equipment operation, emergency response, removing soils, maintenance, transferring waste, excavation, construction and drilling.

United Pumping Service, Inc.

Michelle A. Deras
Environmental Health & Safety/Human Resources
10 Years Experience

- Cal State Dominguez Hills Certified - Environmental and Occupation Health & Safety
- Cal State Dominguez Hills Certified - Safety & Security
- American Red Cross Certified and Authorized Instructor - CPR, First Aid, AED & Blood Borne Pathogens
- National Safety Council Certified Instructor – Forklift Instructor
- Glendale College Certification in Progress – Hazardous Materials & Safety (Hazwoper Certification)
- Caltrans – Traffic Control Training

Professional Experience:

Ms. Deras has over 10 years of experience in EH&S/HR and Worker's Compensation, Payroll and Benefits Management. Ms. Deras has managed all activities involving regulatory compliance and employee safety.

2004 - Present EH&S/HR

and develop strategies in reference Environmental Health & Safety and Human Resources and assure compliance. Monitor and document Employee Injuries and Property/Vehicle damages. Maintain all required permits. Develop Site Specific Health and Safety as required. Oversee

2003 - 2004 Loss Prevention Specialist

Assisted multiple industries with EH&S and HR compliance but creating Plans and providing training in areas such as Injury and Illness Prevention, Hazardous Communication, Lock Out Tag Out, Forklift, etc. Also provided additional training such as CPR & First Aid, Accident Investigation and Reporting, and Worker's Compensation Fraud. Assisted businesses with tactics in Worker's Compensation Cost Reduction.

2000 - 2003 EH&S/Personnel Manager

Oversaw and developed strategies in reference to the Company's Human Relations (Personnel), Labor Law & Environmental Health & Safety Compliance, Training, Compensation Administration, Benefits and Payroll for California, Virginia and Mexico Locations. Drastically reduced Worker's Compensation Injury rate and cost along with litigation ratio.

1994 - 2000 Human Resources and Safety Coordinator

Development, implementation and maintenance of all safety programs. Responsible for employee training and training record maintenance, worker's compensation administration and also performed all aspects of Human Resources and Benefits responsibilities.

Dan Napier

Page 2

Deactivated Research Facilities that were significantly contaminated, developed methods that cost effectively recycled and minimized the waste stream. Managed significantly hazardous clean up projects and construction projects involving the mitigation of hazardous materials and refurbishment of historically significant landmarks. Developed the baseline safety audit concept during the early 1970's. Conducted Safety & Health baseline audits at manufacturing and production facilities, nationally and at overseas sites. Directed and conducted the baseline Industrial Hygiene Audit of all the NASA Jet Propulsion Laboratories at Pasadena.

Relevant Work Experience:

Dan Napier & Associates DNA Industrial Hygiene
15342 Hawthorne Blvd. Suite 400, Lawndale, Ca. 90260-3813
Contact Person: Dan Napier
1978- Present 90%

Scope of Responsibilities:

Dan founded DNA in 1980. It actively is engaged in the improvement of environment in general and more specifically the work area. Directs sub-contractors or General Contractors during the mitigation of various environmental issues, advises and directs environmental assessors. He conducts surveys for industrial hygiene issues, general safety, machine guarding, occupational health safety and employee/management safety systems. He provides accident investigation services. He represents organizations and works closely with the employer's legal representatives during OSHA, Cal-OSHA, AQMD, APCD, EPA and Local Environmental Agency compliance hearings. He teaches coursework that he wrote for workers and managers involved in asbestos and lead mitigation. DNA Industrial Hygiene, Inc., has managed the removal of countless underground storage tanks, demobilized aerospace defense plants and managed extremely complex environmental issues.

Pacific Compensation Insurance Company

Senior Loss Control Consultant and Corporate Industrial Hygienist
11827 Ventura Blvd., Studio City, California 91604

Dates: 1981 to 1984 100%

Provided Safety and health consultation for a broad range of clients. Directed and supervised all aspects of occupational health program.

Mission Insurance Senior Loss Control Representative

2601 Wilshire Blvd., Los Angeles, Ca.

Dates: 1979 to 1981 100%

Safety and industrial hygiene consultation services for all insurance coverage's. Specializing in large organizations. Trained in-house consultation staff. Investigated accidents, conducted plant surveys for compliance with health and safety regulations.

Employee Benefits Insurance Company

Senior Loss Control Consultant

233 Wilshire Blvd., Santa Monica, Ca. 90401

Work Plan

Environmental Investigations and Remediation's

United Pumping will respond to County personnel upon knowledge of Environmental investigation and remediation project.

Upon receiving analytical reports and locations, United Pumping Service can then determine if waste is RCRA , NON-RCRA, or a Non hazardous waste and profiles will have to be made. United Pumping Service can then decide to drum material, pump out drums on site, place into roll-off bins or storage tanks for proper disposal and transportation according to best cost saving method for County of Los Angeles. If hazcatting procedure is needed, United Pumping will send project supervisor with proper personnel and equipment to perform all proper tests to determine what type of waste and proper procedures to properly take care of material.

United will provide proper equipment to load drums, pump liquid out of drums, transport roll-off bins, pump out liquid waste from storage tank and transport to proper disposal facility. United Supervisor will maintain in constant contact with County Supervisor to advise best method of providing service.

United Supervisor will advise all personnel with proper safety procedures and personal protective equipment according to profile of waste and follow all safety procedures when transporting waste. All vacuum drivers and roll- off driver will be advised of all safety procedures prior to leaving for site. All equipment operators will safety inspect all vehicles prior to leaving from United Pumping yard.

Once waste is properly loaded into vacuum truck, drums, roll off bins, supervisor will handle all manifests and have County Supervisor sign all appropriate paperwork and approve completion of project.

County of Los Angeles- Department of Public Works
Proposal for "As-Needed Emergency Removal of Hazardous Material"

Due Thursday, November 10, 2005 5:30 pm

90-Day Hazardous Waste Pick-up

United Pumping will maintain contact with County Representative regarding 90-Day Hazardous and Non-Hazardous Waste pick-up at the various County Facilities.

Upon receiving inventory, United Pumping Service supervisor will meet with a County representative to schedule pick-up of waste according to amount of waste listed at each location. Supervisor will look at sites that might have unusual waste or containers to determine if any special packaging or extra over pack drums are needed. If any special packaging is needed, Supervisor will note to make sure these supplies and equipment are brought with crew for scheduled pick up. A schedule of times and pick up locations will be discussed and called or faxed into the County Representative. Once schedule is approved by the County Representative, United Pumping will prepare all manifests and labels and paperwork necessary for pick-up schedule.

Upon knowledge of amount of waste to be picked up at each location per day, United Pumping Supervisor will determine amount of equipment, supplies, size of transportation vehicle that will be needed as appropriate to size and amount of waste. (i.e.: large Stakebed, closed container truck).

United Pumping Service will send amount of employees necessary to complete size of job. All United Pumping Service employees have been 40 hours Haz-Woper trained and have experience with handling drummed and bulk waste streams. Supervisor and technicians will wear appropriate Personal Protection equipment necessary for type of waste they will be handling. Personal Protection Equipment includes hard hats, steel toe boots, appropriate type of gloves for waste streams they will be picking up, safety glasses, full-face protection if necessary. Safety meeting will be held to assure compliance with all regulations for each specific location.

All waste will be inspected, segregated, lab packed for transportation and disposal. All unknowns to be sampled and or field screened if necessary. All waste will be properly labeled, inventoried and included on appropriate pre-printed manifest. Once all drums or waste have been loaded on vehicle, Supervisor will check with County of Los Angeles Supervisor to obtain all proper signatures needed on manifests.

United Pumping Service Supervisor will maintain contact with designated County of Los Angeles at all times, assuring that all work will be done in a timely, and efficient manner.

County of Los Angeles- Department of Public Works
Proposal for "As-Needed Emergency Removal of Hazardous Material"

Due Thursday, November 10, 2005 5:30 pm

Clarifiers

United Pumping Service will vacuum pump and rinse out clarifiers periodically at various locations per County standards.

All clarifier waste to be determined Hazardous or non-hazardous by analytical or generator knowledge prior to commencement of job.

United Pumping Service Supervisor will obtain information from County Representative and appropriate size vacuum truck will be dispatched to perform cleaning of clarifier. Vacuum truck will be inspected prior to leaving United Pumping Service site. All appropriate paperwork including job work sheet, site contact, and manifest will be reviewed by Supervisor prior to vacuum truck leaving site. Depending on location of clarifier and amount of hose necessary to pump material, appropriate amount of personnel will be sent. All personnel will wear appropriate personal protection equipment for specific waste that will be pumped. All drivers and personnel with United Pumping Service have been 40 hour Haz-Woper trained and have years of experience pumping various waste streams.

United Pumping Service will recommend disposal site based on knowledge and profile of waste. United will make up all appropriate profiles, manifests (Non-hazardous! Hazardous) on waste stream and all regulations will be followed as to handling of material.

United vacuum truck driver will pump and rinse out all waste from clarifier. Manifest will be signed by appropriate County Supervisor. Waste will be transported to proper disposal facility, vacuum truck will offload and rinse out vacuum truck.

Due Thursday, November 10, 2005 5:30 pm

Storm Drain Decontamination (if needed)

United Pumping has years of experience with cleaning out storm drains, culverts and catch basins. We currently clean out all storm drains for Cal Trans- Los Angeles Area. All United Pumping Service personnel are trained in confined space procedures and follow the guidelines set forth by the State of California Occupational Safety and Health Agency (Cal OSHA) and Public Works safety requirements. All traffic control will be determined and assessed as needed per scope of work.

United will contact the County Supervisor and meet at work site to access what type of equipment and personnel are needed to perform work. All equipment will be discussed with County Supervisor to determine exactly what is the most cost effective way to remove material and clean out storm drain. United has several equipment options available to County of Los Angeles including vector jetters, vector guzzlers, vactrons, dewatering bins, roll off bins, temporary tanks, confined space equipment and appropriate traffic control equipment for any size storm drain job. United is able to handle any type of waste that needs to be pumped out of the storm drains, liquid or solid.

Once work option is chosen, all equipment and personnel will be dispatched to site. Supervisor will have tailgate safety meeting prior to any work proceeding. All proper confined space will be set up- including tripods, air monitor, blowers, and personnel protection equipment specific to job. Health and Safety plan will be prepared prior to arrival at site and will be discussed at the tailgate meeting. Radio, phone and signals will be determined before any entry into storm drain. Once air monitor has registered safe entry for personnel- then work will begin. No work will be started unless it has been determined that it is safe for personnel to enter confined space. Appropriate amount of personnel will be on site to assure safety of any personnel in confined space. There will always be a United Pumping Supervisor on site monitoring air and will be logged every 15 minutes. If self supplied air is needed, United will be all appropriate equipment necessary for safety of employees. A confined space permit will be completed and posted at site. All personnel will wear appropriate personal protection equipment including hard hats, steel toe boots, tyvek (appropriate level), safety glasses, full-face respirator, and body harness. There will be extra man suited up at appropriate safety level to be ready in case of emergency. Personnel will be rotated at regular time intervals. Supervisor will continue to monitor air at all times for safety of employees.

Once all material has been removed and cleaned from Storm drain to the satisfaction of County Supervisor- material will be profiled according to vessel that is was loaded into. Depending on vessel (i.e.: Roll-off bins, dewatering bins, vacuum truck (liquid), storage tank (liquid) - waste will be profiled, manifested and transported to proper approved disposal facility.

Emergency Response Procedures

The following questions will be asked when County of Los Angeles-
Department of Public Works & Transfer calls in for Emergency Spill Response

Call: (626) 961-9326 24 hours per day/ 7 days a week

Have ready:

- Caller name, phone number and Department
- Incident location (including cross street)
- Description of material (if known)
 - Liquid, solid, powder
 - Color
 - Odor?
- **Description of container**
 - a) Steel, poly, fiber, other – steel (in this scenario)
 - b) Condition
 - c) Markings
- **Description of spill site**
 - a) Quantity spilled- how large is the spill?
 - b) What spilled?
 - c) Surface- Material on concrete, asphalt or soil, is it in confined space?
 - d) Whether material is contained or “running off”
 - e) Size of area affected
 - f) Whether any drains are affected- did material enter any waterways?

This may seem like a lot of questions but it is accomplished very quickly (1-2 minutes) and helps us to appraise the incident's needs more accurately and respond more efficiently.

United Pumping Service, Inc.

14000 East Valley Blvd, City of Industry, CA 91746 * (626) 961-9326* Fax (626) 336-7734*

EMERGENCY RESPONSE PROCEDURES

"FIRST RESPONDER"

I. Secure Area and Deny Access

- A. Close off access roads and/or adjacent traffic lanes and surface streets. Reopen them when determinations of health and safety factors are properly assessed.**
- B. Evacuate immediate area. DO NOT attempt to rescue anyone directly exposed unless it can be done without endangering additional lives, including your own.**
- C. Deny access to the secured area to all unauthorized people. This includes on lookers, motorists, and/or the news media.**
- D. Establish an area upwind to serve as a staging area for the clean-up personnel and equipment. This area can also serve as a command post for the responding regulatory agencies.**

II. Identification

- A. Keeping upwind, attempt to identify the material using available resources. At no time should you ever approach an unknown spill unless wearing full protective equipment. Possible resources for the identity of the unknown include:**
 - 1. The driver of the vehicle and any type of shipping papers, which would describe the material.**
 - 2. Placards and/or Identification numbers.**
 - 3. Transporter's name and vehicle license number.**
 - 4. Any markings visible on the container:**
 - a. Chemical or trade names.**
 - b. Manufacturer.**
 - c. Hazard class or warning labels.**

III. Relay Information

- A. Relay any information pertinent to the spill to the dispatcher when you call for a response team.**
 - 1. Location of the spill.**
 - 2. Size of the spill area.**
 - 3. Identity of the spilled material, if known. If unknown, any information that relates to the unknown material should be relayed so that a possible identification might be determined.**
 - 4. The location of any waterway that may be affected.**
 - 5. Wind direction and speed (if known). This will aid in the determination of further evacuations.**
- B. Contact CHEMTREC 1-800/424-9300 for assistance in identifying the spill material.**
- C. Contact other necessary agencies:**
 - 1. Local Fire Department ----- 911**
 - 2. Department of Health Services - N. of 91 Fwy. (818) 567-3000
S. of 91 Fwy. (310)590-4936**
 - 3. U. S. Coast Guard -----(310) 499-5555**
 - 4. National Response Center ----- (800) 424-8802**
 - 5. Etc.**

ALL CHEMICAL SPILLS SHOULD BE CONSIDERED EXTREMELY HAZARDOUS UNTIL DETERMINED OTHERWISE. EXTREME CAUTION SHOULD BE EXERCISED WHEN APPROACHING A CHEMICAL SPILL, INCLUDING THE USE OF APPROPRIATE SAFETY EQUIPMENT. IF THE APPROPRIATE SAFETY EQUIPMENT IS UNKNOWN, WEAR FULL RESPONSE GEAR: INCLUDING SELF-CONTAINED BREATHING APPARATUS.

I. LAND SPILLS

A. Containment

- 1. Access population proximity to containment area.**
- 2. Secure containment area.**
- 3. Some type of containment methods include:**
 - a. Dikes, dams, ditches**
 - b. Natural Topography**
 - c. Excavated sumps, ponds, and trenches.**
 - d. Temporary patching or repair of leak.**

B. Isolation

- 1. Prevent incompatible materials from mixing.**
- 2. Segregate incompatible chemicals.**

C. Recovery and Removal

- 1. Once product is contained and isolated, then removal of the product is possible.**
- 2. The product may be recovered or removed for disposal.**

II. WATER SPILLS

A. Containment

- 1. Most difficult when large or moving bodies of water are receptors of the chemical.**
- 2. Containment must be as near the source as possible.**

3. **DO NOT divert liquids to sanitary sewer lines.**
4. **DO NOT trap volatile chemicals enclosed conduits, such as storm drains.**
5. **Some type of containment methods include:**
 - a. **Overflow/underflow dam**
 - b. **Dirt plugs/ traps**
 - c. **Booms, sorbents**

B. Recovery and Removal

1. **Floating substance**
 - a. **Use skimmers, sorbants, scuppers (shoreline pits).**
 - b. **Recovery success depends on effectiveness of containment method.**
 - c. **use prevailing wind direction to assist floating material entering boomed area.**
2. **Solubles and Emulsions**
 - a. **difficult recovery but not impossible.**
 - b. **Activated carbon or precipitation.**

United Pumping Service, Inc proposes to staff the County of Los Angeles – Department of Public Works - Emergency Spill Response Services with qualified, trained personnel capable of responding and handling any situation associated with a off highway emergency response and lab packing, profiling, manifesting, and transporting hazardous waste. The proposed staffing and hierarchy is illustrated below in Figure 1.

Account Representative

Robert Pina
Pamela Heintz

Program Manager

Art Castellanos (see enclosed resume)

Response Foreman & Field Supervisors

Don Moore (see enclosed resume)
Ruben Salazar
Juan Santos
Joe Rosas

Clean-up Technician II

Orlando Allen
Bernie Luna
Jesus Lopez
Juan Meza
Mark Guerrero
Daniel Perry, Jr
Edwardo Perry, III
Ramon Menjivar

United Pumping Service, Inc
Emergency Response Personnel

All Emergency Response Personnel can be reached at

(626) 961-9326

* one of four rotating dispatch personnel on call will contact
one of the eight supervisors on call day and night 24 hours/day- 7 days/week

Personnel	Job Description	Business telephone	Pager	Cell Phone
Bob Pina	Sales Manager	626 961-9326	626 220-0863	626 786-3983
		x 231		
Pamela Heintz	Sales Associate	626 961-9326		626 786-3697
		x249		
Art Castellanos	Program Manager & Senior Emergency Spill Supervisor	626 961-9326		626 786-3486
Joe Rosas	Response Foremen & Field Supervisors	626 961-9326	24 hours day- 7 days/week	
Don Moore	Response Foremen & Field Supervisors	626 961-9326	24 hours/day- 7 days/week	
Ruben Salazar	Response Foremen & Field Supervisors	626 961-9326	24 hours/day- 7 days/week	

County of Los Angeles- Department of Public Works
Proposal for "As-Needed Emergency Removal of Hazardous Material"

Permits

Licenses

Certifications

PROPOSER INFORMATION SHEET
EMERGENCY REMOVAL OF HAZARDOUS MATERIALS

1. Name of Company: United Pumping Service, Inc.
2. Contact Person: Robert Pina
3. Address: 14000 E. Valley Blvd., Industry, CA 91746
4. Telephone Number: 626/ 961-9326
5. General Engineering Class A with HAZ License No.: C21, 31, C42
6. Contractor License No. (if any): 617639
7. State of California Hazardous Waste Material Hauling License No.: 063
8. State of California Highway Patrol License No.: 27388
9. Federal Environmental Protection Agency License No.: CAD072953771
10. Trauma Scene Waste Management Practitioner License No.: TSW 79
11. Medical Waste Hauler Registration License No.: 0063

A brief description of the Company's history:

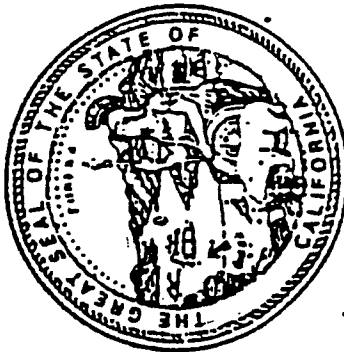

United Pumping Service, Inc. was founded in 1970 and incorporated in 1974.

United is a fully qualified environmental remediation, transportation and emergency spill response contractor. The company offers a full spectrum of hazardous waste handling and remedial action activities.

INDUSTRY, CA 91746

This certifies that the registrant is registered with the U.S. Department of Transportation as required by 49 CFR Part 107, Subpart G.

This certificate is issued under the authority of 49 U.S.C. 5108. It is unlawful to alter or falsify this document.

Reg. No: 062705 008 031N **Issued:** 06/28/2005 **Expires:** 06/30/2006

Record Keeping Requirements for the Registration Program

The following must be maintained at the principal place of business for a period of three years from the date of issuance of this Certificate of Registration:

- (1) A copy of the registration statement filed with PHMSA; and
- (2) This Certificate of Registration

Each person subject to the registration requirement must furnish that person's Certificate of Registration (or a copy) and all other records and information pertaining to the information contained in the registration statement to an authorized representative or special agent of the U. S. Department of Transportation upon request.

Each motor carrier (private or for-hire) and each vessel operator subject to the registration requirement must keep a copy of the current Certificate of Registration or another document bearing the registration number identified as the "U.S. DOT Hazmat Reg. No." in each truck and truck tractor or vessel (trailers and semi-trailers not included) used to transport hazardous materials subject to the registration requirement. The Certificate of Registration or document bearing the registration number must be made available, upon request, to enforcement personnel.

For information, contact the Hazardous Materials Registration Manager, DHM-60, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590, telephone (202) 366-4109.

MTA File 1404

Eduardo T. Perry
United Pumping Service, Inc.
14000 E. Valley Blvd.
Industry, CA 91746

RE: Minority-Owned Business Enterprise Certification

Dear Mr. Perry:

We are pleased to advise you that after careful review of your application and supporting documentation, the Los Angeles County Metropolitan Transportation Authority (MTA) has determined that your firm meets the eligibility standards to be certified as a Minority-Owned Business Enterprise (MBE) as required under the MTA MBE Program. Your firm will be listed in the MTA MBE database of certified MBEs under the following specific areas of expertise:

<u>NAICS(2002)</u>	<u>Description</u>
238910	Site Preparation Contractors
484230	Specialized Freight (except used goods) Trucking, Long Distance
562112	Hazardous Waste Collection

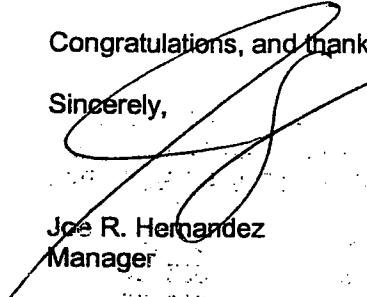

Your MBE certification is good for two years from the date of this letter and applies only for the above NAICS 2002 codes. Requests for additional or revised NAICS 2002 codes must be made in writing to the MTA. After the two-year certification period, your entire file will be reviewed in order to ascertain continued MBE certification status. You will be notified of the pending MBE status review and any documentation updates necessary prior to the expiration date.

Should any changes occur that could affect your certification status, such as changes in your firm's name, business/mailling address, ownership, management or control, please notify MTA immediately. MBE certification is subject to review at any time.

MTA reserves the right to withdraw this certification if at any time it is determined that certification was knowingly obtained by false, misleading, or incorrect information. MTA also reserves the right to request additional information and/or conduct on-site visits at any time during the certification period. The firm thereby consents to the examination of its books, records, and documents by the MTA.

Congratulations, and thank you for your interest in MTA's MBE Program.

Sincerely,

Joe R. Hernandez
Manager

Dear Mr. Perry:

Congratulations! Your firm has been recertified as an eligible participant in the County of Los Angeles Community Business Enterprise (CBE) Program. This recertification is valid until August 19, 2005.

The County of Los Angeles Office of Affirmative Action reserves the right to request additional information and/or conduct an on-site visit at any time during the certification process to verify any documentation submitted by the applicant. If there are any changes in ownership or control of the firm during this certification period, you are required to notify this office immediately.

You should also register your business with the County's Vendor Registration website (WebVen) at <http://camisvr.co.la.ca.us/webven> to participate in the County's online access to County open bids, be placed on bid lists generated by County departments looking for prospective vendors and periodically be notified automatically by email of County bids by specific commodities/services.

Again, congratulations on your recertification. If you have any questions, please call (213) 974-0912 and refer to the identification number above.

Sincerely,

DENNIS A. TAFOYA

**Licensed A-General Engineering Contractor
Licensed Demolition Contractor
Hazardous Substances Removal and Remedial Action Certification
California License No. 617639**

SUMMARY

United Pumping Service, Inc. (United) is a fully qualified environmental remediation, transportation, and emergency spill response contractor. The company offers a full spectrum of hazardous waste handling and storm water remedial action activities.

With a background of more than 33 years in hazardous waste removal/transportation and more than 17 years in solving remedial action problems for clients, United brings an outstanding level of technical experience, physical resources, and practical know-how to each job.

Services:

- Sludge De-Watering & Management
- Hazardous materials emergency spill response
- Traffic Control (static & moving closures)
- Hazardous waste handling & Lab packing
- Waste identification & profiling
- Waste transportation and disposal
- Decontamination of equipment, tanks, and structures
- Demolition of equipment and structures
- Contaminated soil excavation and removal
- Above and below ground tank removal

Health & Safety Program

United has extensive health and safety experience in various working environments. The company's health and safety program is managed by well trained, experienced, certified personnel and meets requirements of Title 8, California Code of Regulations.

Experience

United Pumping Service, Inc. has the experienced individuals that have been successful with United Pumping for many years. These individuals along with the rest of the employees of United Pumping, have successfully completed more than 1100 remediation and/or emergency response projects for clients in petroleum, chemical, aerospace, heavy manufacturing industries and the public sector. Contracted to the State of California as the General Contractor. Major projects are often performed concurrently.

Responsibility

A strong financial position and bonding capability, a sound reputation with clients and vendors alike, and appropriate insurance coverage's, assures clients that United is capable of successfully completing any project taken on, and that the company stands behind the work.

Conclusion

United's remedial experience, practical know how, proven track record and long standing reputation, assure sound environmental remediation/hazardous waste services for your company or client. Large or small, simple or complex, selecting United will assure the successful completion of your project.

CORPORATE HISTORY/BACKGROUND

Eduardo T. Perry, providing vacuum truck service to industry founded United Pumping Service in 1970. The company grew as a result of providing high quality specialty services such as corrosives removal.

During this time, United Personnel developed extensive experience in the handling of extremely hazardous materials on a routine basis. This made the company well matched for the hazardous waste needs of the Aerospace/Defense Industries.

In 1974 United Pumping Service incorporated and continued to grow as a service oriented hazardous waste transportation firm. The company continued to specialize in highly corrosive materials and designed and built it's own custom equipment. As customer's hazardous waste needs changed, the company broadened its capabilities to include numerous transportation and remediation services. Demand for non-transportation services grew and the company began performing contaminated soil and U.S.T. excavations/removals as well as site decontaminations.

In the meantime, various members of Mr. Perry's family had joined the firm, adding to its strong core of key managers. As new regulations were imposed, the firm moved quickly to provide the hazardous waste removal and site remediation services clients needed to remain in compliance.

In 1982, United initiated its first hazardous materials emergency response contract with the State of California, Department of Transportation. This new service matched well with the company's capabilities as the firm had already been providing emergency service to aerospace firms for many years. Additional emergency response contracts with various municipalities and private sector clients were also obtained.

The following years included steady growth and the capture of a larger market share, particularly in the aerospace industry. United continued to develop specialized capital equipment and broaden its range of capabilities. The firm began focusing on medium to large sized remediation projects as both a primary and subordinate contractor. The firm was very successful, particularly in decontamination/demolition projects where it's crews were well adapted.

As aerospace/defense spending declined with the end of the "Cold War", United further developed and emphasized its remediation capabilities. The firm invested in required management personnel and capital equipment.

To meet the needs of our customers United expanded the remediation department to include storm water remediation. In 1994 the State of California contracted United for the largest Storm water remediation project in the United States. This project required all storm drains (in Los Angeles, Kern, Ventura Counties) be inspected, inventoried, cleaned and the waste materials tracked and managed in the most cost-effective manner. All tasks were completed on schedule, on budget and within the time restrictions imposed by the court ordered injunction. United has continued to meet all the requirements of this contract to-date, San Bernardino, Riverside and Orange Counties.

The firm continues to provide the best service available with a "Ranch Hand" team philosophy where all employees work hard and "wear different hats" to assure customer satisfaction. The storm water remediation department has since grown into a different company; United Storm Water, Inc.

SERVICES AND CAPABILITIES

During the more than 33 years of hazardous waste cleanup and removal, United has developed a broad base of capabilities. As a result, United is able to offer the following services:

- Sludge De-Watering & Management
- Hazardous materials emergency spill response
- Traffic Control (static & moving closures)
- Hazardous waste handling & Lab packing
- Waste identification & profiling
- Waste transportation and disposal
- Decontamination of equipment, tanks, and structures
- Demolition of equipment and structures
- Contaminated soil excavation and removal
- Above and below ground tank removal

Sludge De-Watering & Management

United has been permitted with a Transportable Treatment Unit (TTU) Conditional exempt permit by the California Department of Toxics Substances Control for de-watering sludge. We have been removing the waste from the storm drain systems, clarifiers, drilling mud and other sludge waste for over five years with Industrial Vacuum Trucks and placing sludge into roll-off bins for de-watering.

—The de-watering roll-off bin provides many means of cost savings. It reduces volume of waste going to a landfill, cuts transportation costs, eliminates solidification costs and reduces handling costs.

The de-watering roll-off bins are the simple, inexpensive way of separating the solid and liquid phases of sludge. The filters are so effective in trapping solids, hydrocarbons and heavy metals that expelled water is compliant with . "N.P.D.E.S. Regulations" and "Clean Water Act".

Traffic Control (static & moving closures)

United has been responsible for planning the, activating, and maintaining of over 3,500 static closures per year for the past four years. United is one of the few companies that will run moving closures. We have been responsible for the planning, activating, and maintaining over 1,500 moving closures per year for the past four years.

All Supervisors & Technicians are trained annually in proper traffic control procedures for California Department of Transportation in accordance with Chapter eight.

Sampling and Identification

To satisfy client sampling/identification needs United provides a variety of sampling/identification services. In many instances, the identification of a sample may be unknown. United has various personnel trained and equipped in the "Haz Cat" identification method for unknown materials. All samples taken and handled are performed in compliance with regulations.

Both onsite and offsite laboratory services are available through various prominent certified laboratories.

Hazardous Waste Handling

To augment clients' hazardous waste management programs, United provides a variety of hazardous waste handling services. United provides crews to perform hazardous waste management services at customers' premises on routine or as needed basis. These services include:

- Hazardous waste collection, segregation and consolidation
- Waste labeling and inventory preparation
- Waste compaction and consolidation

Hazardous waste handling for clients has been very beneficial, as it has enabled our customer's to fulfill their needs without maintaining costly full time employees and maintaining required training.

Waste Identification and Profiling

United's supervisors and project managers have been trained in the HAZ CAT method of identifying unknown materials. They are able to identify unknown substances based upon the results of a series of bench tests. This information is vital in determining how wastes are to be packaged, shipped and disposed of, as well as what safety precautions are required for field personnel. Additional laboratory analysis is often obtained and submitted to disposal facilities along with waste profile forms. Customer waste profiles are tracked internally and are rushed through disposal facility waste acceptance procedures as needed.

Decontamination of Tanks, Equipment, and Structures

In many remediation projects, the surface areas of tanks, equipment and structures have been contaminated with a variety of hazardous residues. United is fully equipped to decontaminate all of these areas through various mechanical and chemical methods. These items are often decontaminated and reused, resold, or recycled, to recover their value.

United has decontaminated many types of surfaces and worked with virtually all forms of contaminants including heavy metals, M.D.A., petroleum and lead. Common decontamination methods include high-pressure washing, steam cleaning, sand blasting, acid leaching, bead blasting, and wiping by hand. In each case, United has provided practical solutions and succeeded in achieving client objectives.

Demolition of Equipment and Structures

When decontamination of equipment and/or structures is completed or uneconomical to perform, demolition is often required. United provides demolition services for both contaminated and non-hazardous items. Some areas may require partial or complete demolition prior to decontamination and scrap phases.

Over the years United has performed numerous demolition projects such as, plating production lines, overhead and sub-grade ventilation systems, concrete vaults, steel tanks, cooling towers, concrete slabs and entire buildings.

Contaminated Soil Excavation and Removal

United assembles and implements efficient and cost-effective contaminated soil removal programs tailored to meet specific project criteria. Services include excavation, shoring, spreading, aeration, transportation, and disposal. Since United owns it's own equipment and employs it's own operators, project scheduling is not a problem.

United has vast experience in this area, particularly on sites with limited access, overhead restrictions, on rights of way, inside buildings, and on rough terrain. United maintains open accounts at a great many T.S.D.F.'s for soil burial, fixation, or thermal treatment.

Above and Below Ground Tank Removal

United Pumping Service, Inc. has complete capability of above and below ground tank removal. This capability includes unearthing, draining, washing and extraction of tanks. All work is performed in strict conformance with South Coast Air Quality Management District's Rules 1166 and 1149. Usually tanks are decontaminated and recycled for scrap, partially offsetting project cost.

The United organization has vast experience removing tanks; particularly those posing unusual challenges due to access restriction and/or time constraints.

Waste Transportation and Disposal

United transports all forms of hazardous waste, excluding radioactive, explosives and some compressed gases. The United organization provides a full line of transportation services utilizing a company owned and operated fleet of equipment. U.P.S. transports hazardous waste throughout the continental United States.

As the 63rd transporter to be licensed as a hazardous waste hauler in California, U.P.S. has the experience and where with all to get the job done regardless of the type of waste or mode of transportation. Over the past 29 years, United has success-fully completed tens of thousand of hazardous waste shipments without a release.

United clients enjoy prompt waste profiling and waste acceptance into many waste disposal facilities. Due to United's large volume as a hazardous waste agent for it's clients, U.P.S. clients typically enjoy reduced disposal fees and no profiling fees. United maintains open accounts and active-working relationships with a great many T.S.D.F.'s, thus availing its clients of vast disposal options.

Hazardous Materials Emergency Spill Response

United is fully qualified to provide emergency spill response services to its clients. The firm performs hazardous materials cleanups for clients throughout Southern California, on highways, waterways, and client facilities. United utilizes skilled, experienced field personnel and company owned equipment for rapid, safe, and efficient responses. United responds to any release except for radioactive, explosives, and some compressed gases.

The firm has worked under open master purchase agreement with the State of California, Department of Transportation for this past seventeen years. During that time, United has performed approximately 2000 hazardous materials release cleanups. Many have required sub-grade and/or water way work.

Private sector projects have included rail right of way releases as well as spills resulting from fires, earthquakes, and illegal drug laboratories.

U.P.S. is capable of responding to multiple spills simultaneously. All field personnel are crossed trained in hazardous materials emergency spill response.

Regulatory Compliance/Health and Safety Program

United Pumping Service, Inc. (U.P.S.) is proud of our exceptional compliance record in employee safety and in the management of hazardous waste/materials.

United staff maintains and works from an extensive federal and state regulatory data base in identifying special requirements and delineating the various options available under current regulations pertaining to the remediation and transportation of hazardous waste/materials.

United was awarded a certificate of achievement from the California Highway Patrol for maintaining a Consecutive Satisfactory Rating Since 1990. This rating is related to operational terminal biennial inspection for our compliance with applicable laws and regulations relating to motor carrier safety. We also, are proud of our consecutive Satisfactory Rating with the United States Department of Transportation. Every project we work on involves dangerous chemicals that are not only dangerous to our employees but could damage the environment and/or the public safety. Therefore, any injured worker is required to be seen by the Company Doctor to be evaluated for chemical exposure. Additionally, all employees must participate in the company drug and alcohol screening program. You can rest assured that when one of our trucks and/or crews are handling your chemicals, they are drug free, experienced, and in fit condition for the work.

We feel that there are many factors involved in a successful safety program. At U.P.S. we have been concentrating on three main areas; 1. Specialized training for every driver and technician. 2. Experienced Personnel. 3. Well maintained equipment.

We are committed to an on-going successful safety program and continuously strive for improved results.

KEY PERSONNEL

The following resumes are an indication of the experience of United personnel. The United Team has decades of hands-on experience in the ever-changing field of hazardous waste/site remediation. It is their commitment and expertise, which elevates United above the competition.

United Pumping Service, Inc.

Eduardo Perry, Jr.
General Manager
24 Years Experience

A.S. 1976, Building Technology
B.A. 1979, Accounting

Management Experience

Mr. Perry's experience as a remediation contract manager has included projects throughout California. He is the company's qualifying responsible managing employee for its A-General Engineering License. Mr. Perry also maintains hazardous substances removal and remedial actions certifications and an asbestos abatement certification. Mr. Perry has overseen site remediation projects including production line decontamination /demolition and underground tank removals. Mr. Perry has supervised such projects at aerospace facilities throughout Southern California. He was primary responder on hazardous materials spills for Cal Trans, identifying and removing various chemical releases. Mr. Perry has overseen the development of specialty transportation equipment allowing greater flexibility in delivering small quantity shipments, which has resulted in increased efficiency and lower client costs. Furthermore, Mr. Perry has been responsible for oversight of all company operations, including all project management personnel. He also manages the company's legal and liability concerns. Likewise, company fiscal accounting systems including cost estimating are under Mr. Perry's control.

Recently Completed Projects

1. He has overseen all tank removal and/or replacement projects both above and below ground. He has performed decontamination/remediation projects from start to finish at Allied Signal, General Dynamics, and Lockheed facilities.

Career Highlights

- o Project Manager - Cal Trans, crude oil tanker spill cleanup of 2 miles of channel. Around the clock operation, \$300K Los Angeles, CA
- o Project Manager - Cal Trans, Century Freeway Project, site excavation, underground tank and contaminated soil removal, \$1 million plus.
- o General Manager - Firm selected as Latin Business Association, established Business Of The Year 1996.

United Pumping Service, Inc.

Eduardo Tavaréz Perry, Sr. - President

Eduardo T. Perry, Sr. began his working career as a field laborer working long hard hours, seven days a week picking crops.

This Texan - Born in Presidio, Texas left his home state and moved to California at the age of fifteen, taking menial jobs from washing cars to a general laborer in construction. Eduardo worked at a trucking firm and eventually became manager of that company. It was at that trucking company that Eduardo's ambition to own his own business began to take shape.

With the support of his young wife, Margaret, who he met in California and coincidentally was also from Presidio, Texas they agreed to purchase a used pump truck and establish their own business, United Pumping Service, the year was 1970. First year sales was under 5,000 dollars but Eduardo's early working years instilled a work ethic of tremendous value and learning experience as the second year had explosive growth to over 42,000 in sales. As Eduardo Perry's reputation for high quality responsive service began to grow, so did United Pumping.

Eduardo Perry's Company, United Pumping Service, maintains the same ranch hand attitude today, providing the customer with the same high quality responsive service that the company was built on, and has grown from its modest beginning of under 5,000 to over 12 million dollars in sales revenue. Eduardo T. Perry, Sr. stands as President of one of the most reputable and recognized hazardous waste transporters in the State of California.

Eduardo T. Perry, Sr. is now semi-retired, however he still continues to assist in the daily operations of the company, which is now managed by his son, Eduardo C. Perry, Jr.

United Pumping Service, Inc.

Margaret Perry - Vice President Sales & Marketing

Margaret Perry joined the family business six years ago and acts as Vice President Sales & Marketing. She oversees the company's sales program and maintains all minority/disadvantage business enterprise certifications.

United Pumping Service, Inc.

Robert Pina
Senior Project Manager
15 Years Experience
U.P.S. Grade: Senior Level

Construction Experience

Mr. Piña has managed several projects for both government and private sector clients. He has managed the remedial activities for clean-up of contaminated soil, underground storage tanks and ground water contamination. His responsibility to direct and oversee his subordinates in the proper handling and disposition of hazardous and non hazardous materials and waste. Other responsibilities include bid review, research, project feasibility, and project cost estimating.

Completed Project

- * Project Manager - BOC Gases, City of Industry, California. Decontaminated and demolition of (3) three cooling towers, removed all associated wood, piping, concrete pits, and properly disposed of materials at designated disposal facilities.
- * Project Manager - Confidential Aerospace Firm, Los Angeles, County, California. Conducted closure tasks decontamination of processing line consisting of forty (40) process tanks, decon 2,500 linear feet of associated piping, properly disposed of all hazardous waste.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County, California. Removal of UST, sample soil, backfill, and compact.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County, California. Removal of UST, sample soil, backfill, and compact.
- * Project Manager - Confidential Aerospace Firm, Los Angeles County. Managed decontamination of process line. (Chemical types: acid, cyanides, alkalines) Pressure wash above ground tanks piping characterize, profile waste for transportation and disposal.
- * Senior Project Manager - Mitchell Rubber, City of Industry, California. Oversaw cleanup of non hazardous waste from fire damage interfaced with owners and County Fire to properly clean up and dispose of wastes.

United Pumping Service, Inc.

Art Castellanos

Project Manager/ Senior Emergency Responder UPS Emergency Response Team

Environmental Safety Coordinator

11 Years Experience UPS ER Team

Profile of Training

Certified Instructor OSHA-SARA (40 hour 29 CFR 1910-120 Hazardous Waste Operations and Emergency Response)

Certified Emergency Responder for Derailments

Hazcat Chemical Identification Course/Haztech Systems

Certified in Self-Contained Breathing Apparatus/Confined Space Entry

CPR & First Aid

Confined Space Entry Training Certification

Personal Protective Equipment (Selection & Use)

Air Purifying Respirators & Maintenance

Scott 60-Min. Self-contained Breathing Apparatus

Supplied Airline Mask

EPA Define Levels of Protection

Decontamination Procedures

Chemical Exposure, Body Routes of Entry

Lab packing Procedures

Compatibility & Storage of Chemicals

Hazardous Classification of Chemicals

NFPA 704M Hazard ID System

Uniform Hazardous Waste Manifest

Air Monitoring & Instrumentation

Rescue Procedures

HazCat Identification of Unknown Chemicals

EPA Sampling Methods

Forklift Operations

Safe Drum Handling Techniques

Vehicle Placarding

Federal Motor Carrier Safety Regulations

Drum & Container Transportation

Advanced Emergency Response

Instruct 8hr., 24hr., and 40hr. HAZWOPER training, Confined Space Entry training, Environmental Compliance training, PPE training, Hazardous Material Response training, and other assigned training.

Profiling, Waste Management

Professional Experience

Supervise emergency response teams in the clean up of all liquid and solid hazardous material spills, including contaminated soil remediation, and removal of aboveground and underground storage tanks. Identify, consolidate, manifest and profile hazardous waste for transportation and disposal. Investigate unknown chemical dumping, and perform field analysis. Do estimating and cost quotations, operate heavy equipment and maintain state enforced regulatory safety conditions. Mr. Castellanos is also United Pumping Service's Environmental Safety Manager and manages all activities involving regulatory compliance, employee and public safety. Mr. Castellanos has successfully supervised safety and project activities for major remediation projects throughout the United States without any serious injuries to site workers or regulator violation.

Completed Projects

1. Project Supervisor - Site Closure - PSA, San Diego, CA Supervised 15 man crew, decontamination and disposal of hazardous materials, removal of underground and above ground storage tanks, profiling of waste and coordinating transportation and disposal to approved disposal facility, drum handling, characterizing material by Hazcat.
2. Project Supervisor - Site Closure - TRW Environmental, Industry, CA Supervised 15 man crew, decontamination and disposal of hazardous materials, removal of underground and above ground storage tanks, profiling of waste and coordinating transportation and disposal to approved disposal facility, drum handling, characterizing material by Hazcat.
3. Project Supervisor - Site Closure - Ford Motor Company, Milpitas, CA Supervised 15 man crew, decontamination and disposal of hazardous material, removal of underground and aboveground storage tanks, profiling of waste and coordinating transportation and disposal to approved disposal facility, drum handling, characterizing material by Hazcat.

Hydro Blasting Equipment
CCTV Pipeline Video Operator

Management Experience

Mr. Perry's development as a Senior Project Manager include; research, bid review, project feasibility, and project cost estimating. His extensive experience enables him to identify tasks, determine sub-tasks and develop efficient methodology for the successful completion of projects. Mr. Perry's 24 hour emergency spill response experience and 40 hour OSHA training has enabled him to quickly determine remediation project requirements. He is a hands-on / can- do" manager of remedial actions providing services to governmental agencies and private sector companies within the following industries; which include the aerospace, circuit board manufacturing, auto manufacturing, metal finishing, chemical manufacturing and the transportation. He is involved daily with tasks for 24 hour emergency response, personnel and equipment dispatching. He directs the cleaning and removal for the above ground and below ground storage and process tanks with their attendant overhead and below ground pipe removal. He administers the demolition, excavation, surface decontamination, hazardous waste identification, handling, segregation, storage, characterization, profiling, and transportation for disposal of waste streams. He adheres to the guidelines set forth in OSHA Title 29, CFR 1910.120, 29 CFR, 40 CFR, and 49 CFR while conducting tasks which are considered to be handling of exposed to hazardous materials, substances, and waste.

Recently Completed Projects

1. Superintendent - Los Angeles Civil Unrest Clean-up, Los Angeles, CA.. The project consisted of approximately 150 burned buildings throughout Los Angeles County. Demolition Decontamination, manifesting, transportation and disposal at approved facilities. Demolition, decontamination, manifesting, transportation and disposal at approved facilities.
2. Superintendent - Ford Assembly Plant, Milpitas, CA. The facility was 2 million square feet. Demolition, decontamination, excavation, characterization of waste for transportation and appropriate disposal.
3. Superintendent - Henry Soss Co., Los Angeles, CA./ A subsidiary of Yale Security, Inc. The facility was a 40,000 square foot hinge manufacturing and plating facility with 10 different areas. 90 above ground process & treatment tanks, approximately 300 linear feet of ventilation and scrubbing system ducting, approximately 5000 linear feet of process piping, one roof mounting ventilation scrubber, two metal dust collecting cyclones, and approximately 1000 linear feet of above head conveyance system.

4. Superintendent - Pacific Southwest Airmotive Facility Closure, San Diego, CA. The facility was a 78,000 square foot jet engine rebuilding and test facility with 66 different areas, 60 process tanks up to 4800 gallon capacity, 4 underground storage tanks up to 10,000 gallon capacity, approximately 3000 linear feet of above head and below grade ventilation and scrubbing system ducting up to 48" diameters, 175' of underground ventilation tunnel, two 45,000 cubic feet per minute and one 25,000 cubic feet per minute roof mounted ventilation scrubbers, and approximately 15,000 linear feet of process piping.

Career Highlights

- o Senior Project Manager - Orange County River spill clean-up Senior Project Manager - Southern Pacific derailment fuel spill clean-up involving remedial action for hydrocarbon contaminated soil.
- o Senior Project Manager - Cal Trans Newhall, CA preliminary site assessment, installed boring for monitoring wells, excavated gasoline contaminated soil, and transported to an approved disposal facility.
- o Senior Project Manager - Confidential Client, Anaheim, CA Hazcat (tm) 20,000 drums for identification, transporting and disposal at approved facilities.
- o Senior Project Manager - Bonanza Aluminum, Ontario, CA.. Underground clarifier removal, contaminated with corrosive materials, and plant decontamination.
- o Senior Project Manager - Hurst Graphics, Glendale, CA. Petroleum contaminated soil excavation, transportation and disposal at approved disposal facility.

United Pumping Service, Inc.

Don Moore

Field Supervisor / Emergency Responder UPS Emergency Response

8 Years Experience UPS ER Team

22 Years Experience in Chemical Field

Specialize in hazardous waste water pre-treatment of compound chemicals

Certified Instructor OSHA-SARA (40 hour 29 CFR 1910-120 Hazardous Waste Operations and Emergency Response)

Certified Emergency Responder for Derailments

Hazcat Chemical Identification Course/Haztech Systems

Certified in Self-Contained Breathing Apparatus/Confined Space Entry

CPR & First Aid

Specialize in Waste Water Pre-treatment, acids, and alkalines

Customer service and emergency response supervisor for 10 years with UPS ER team

Certified Instructor OSHA-SARA (40 hour 29 CFR 1910-120 Hazardous Waste Operations and Emergency Response)

Certified emergency responder for derailments Hazcat chemical Identification course/Haztech system

Certified in self-contained breathing apparatus/confined space entry

CPR & First Aid

Certified for Microsoft Excel, Power Point at Glendale College

Previous experience

TRW Cinch Graphic – 1976-1979

Position: Chemical Maintenance: Mixing acids, solvents, maintaining pumps and filter systems, operating waste water treatment systems, constructing new plumbing systems for water systems.

Crown City Plating, Inc. 1979

Temple City, Ca.

Position: Waste Treatment Operator: Maintain records of all water treatment plant, also operated forklift. (Forklift Safety I).

Printed Circuit Products Inc./Bison Technical 1979-1983

Industry, Ca.

Position: Plant Supervisor: Maintained all production records, supervised all chemical maintenance modifications, operated all pre-treatment, and waste water treatment procedures, maintained all chemical records, inventories, pumps, filter systems also limited electrical and plumbing duties. Operated forklift.

Don Moore
Page 2

Benchmark Technology 1984-1989
Industry, Ca.

Position: Chemical Maintenance Sr. II Leadman: Supervised general maintenance of all chemical plating tanks, mixing and blending acids and alkaline solutions, maintained chemical inventory of all incoming and outgoing chemicals, (Waste disposal). Managed water treatment for industrial stream, maintained all files of on site chemicals. Improvised safety training and use of MSDS. Maintained all pumps, filter systems and new construction of chemical areas.

Professional experience:

Supervise emergency response teams in the clean up of all liquid and solid hazardous material spills, including contaminated soil remediation, and removal of above ground and underground storage tanks. Identify, consolidate, manifest and profile hazardous waste for transportation and disposal. Investigate unknown chemical dumping, perform field analysis. Do estimating and cost quotations, operate heavy equipment and maintain state enforced regulatory safety conditions.

Storm Water Division, Project Manager

Worked on the 1998 CalTrans storm drain inspection and cleaning project. Directing and supervising crews on safety aspects of traffic control and confined space entry. Coordinate the workflow and maintain records for the state.

Sales and Marketing of company services through the Internet.

United Pumping Service, Inc.

Joe Rosas

Relevant Work Experience:

United Pumping Service, Inc. Hazmat Technician/Supervisor
14000 E. Valley Blvd., Industry, Ca. 91746 (626) 961-9326
September 1996- Present

Training Profile

Certified OSHA-SARA 1910.120 Hazardous Waste Operation Training 40 hour and 8 hour refresher: Hazardous Emergency Response, Site Characteristics, Regulatory Composition, Compatibility & Storage of Chemicals, Hazardous Classification of chemicals, Principles of Industrial Hygiene, PPE, Medical Surveillance, Site Control, Safety Plans, Instruments, Engineering/Administrative Controls, Confined Space, Decon, Site Emergency, Transportation and Disposal.

Hazardous Endorsement

CPR& First Aid

Respirator Fit-Test Training

DOT Training

HAZCAT Training

Forklift Training

Scope of Responsibilities:

Supervises hazardous materials cleanup crews handling various materials, tank cleaning, stabilization, solidification, lab packing, demolition crew on plant closures, and emergency spill response. Package and transport hazardous chemicals and materials.

Proven experience in operating response equipment and performing maintenance and the set up of that equipment.

CalTrans, LA County Fire, LA County ISD, Pacific Bell, LA County Parks & Recreations Hazmat Emergency Response Technician and Supervisor: Supervise and clean up chemical spills and clean chemical tanks. Lab Pack waste chemicals and package bulk waste chemicals in containers for proper disposal. Inspect and clean storm water drains. Enter and clean storm water pump houses under confined space procedures. Manifest, package, label and transport chemical drums for proper disposal. Conduct ground water/soil sampling, equipment operation, emergency response, removing soils, maintenance, transferring waste, excavation, construction and drilling.

United Pumping Service, Inc.

Michelle A. Deras

Environmental Health & Safety/Human Resources

10 Years Experience

- Cal State Dominguez Hills Certified - Environmental and Occupation Health & Safety
- Cal State Dominguez Hills Certified - Safety & Security
- American Red Cross Certified and Authorized Instructor - CPR, First Aid, AED & Blood Borne Pathogens
- National Safety Council Certified Instructor – Forklift Instructor
- Glendale College Certified – Hazardous Materials & Safety (Hazwoper Certification)
- Caltrans – Traffic Control Training

Professional Experience:

Ms. Deras has over 10 years of experience in EH&S/HR and Worker's Compensation, Payroll and Benefits Management. Ms. Deras has managed all activities involving regulatory compliance and employee safety.

2004 - Present EH&S/HR

Oversee and develop strategies in reference Environmental Health & Safety and Human Resources and assure compliance. Monitor and document Employee Injuries and Property/Vehicle damages. Maintain all required permits. Develop Site Specific Health and Safety as required.

2003 - 2004 Loss Prevention Specialist

Assisted multiple industries with EH&S and HR compliance but creating Plans and providing training in areas such as Injury and Illness Prevention, Hazardous Communication, Lock Out Tag Out, Forklift, etc. Also provided additional training such as CPR & First Aid, Accident Investigation and Reporting, and Worker's Compensation Fraud. Assisted businesses with tactics in Worker's Compensation Cost Reduction.

2000 - 2003 EH&S/Personnel Manager

Oversaw and developed strategies in reference to the Company's Human Relations (Personnel), Labor Law & Environmental Health & Safety Compliance, Training, Compensation Administration, Benefits and Payroll for California, Virginia and Mexico Locations. Drastically reduced Worker's Compensation Injury rate and cost along with litigation ratio.

1994 - 2000 Human Resources and Safety Coordinator

Development, implementation and maintenance of all safety programs. Responsible for employee training and training record maintenance, worker's compensation administration and also performed all aspects of Human Resources and Benefits responsibilities.

Past and Present Experience

Program Title: AIR FIELD UST/AST REMOVAL AND CONTAMINATED SOIL EXCAVATION

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	P.S.A., San Diego McLaren Hart	137401	Fixed Price
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
1/92 - 95	\$236,675	\$500,000	
Client/Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Matthew McCullough McLaren Hart Irvine, CA 92714 714/756-2667	N/A	N/A	

Brief Description of Environmental Remediation Effort:

UPS performed facility closure activities for PSA at Lindbergh Field in San Diego. This included excavating, cleaning, and removing numerous underground storage tanks previously containing jet fuel and oil. Cleaned and removed subsequent piping. Drained above ground tanks, segregating solutions by compatible waste streams. Decontaminated and dismantled above ground tanks previously containing acids, alkalines, degreasers, and oils. Cleaned and removed concrete floors, grating, and ventilation ducting. Excavated and removed contaminated soil. Cleaned and demolished below ground clarifiers and sumps. Collected, stored, transported, and disposed of tank fluids, rinseates, dismantled tanks, contaminated soils and debris. Backfilled and compacted excavated areas, matching existing grade.

Relevancy to Contract

Technical Relevance:

Concrete demolition and soil excavation was performed in confined areas with limited access. Confined space hazardous waste site entries were required. Mechanical sand blasting performed on concrete, enabled cheaper, safer disposal of concrete rubble as non hazardous waste. Many tank fluids were incompatible requiring added precaution.

Management Relevance:

UPS managed and performed multiple concurrent tasks in multiple areas. Contract handled as fixed fee, charges handled both on time and material and lump sum costs. All completion deadlines were met.

Cost Relevance:

Project completed as bid.

Past and Present Experience

Program Title: 14,000 DRUMS CLEANUP AND DISPOSAL A CALIFORNIA SUPERFUND SITE

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Inmont Corp./Canonie Environmental		T & M Established Rates
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
1984	\$168,000	\$168,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Phil Antomania Canonie Environmental Chesterton, IN 219/926-8651	N/A	N/A	

Brief Description of Environmental Remediation Effort:

Cleanup of Superfund abandoned drum site in Southern California, containing approximately 14,000 drums of paints and solvents, many of which had caught fire. UPS carefully unstacked and uprighted damaged, delapidated drums. Opened, sampled, and segregated drums by hazardous waste characteristics. Consolidated, transported and disposed of fluids and sludges. Removed, transported and disposed of contaminated soils. Constructed a clay cap over the site.

Relevancy to Contract

Technical Relevance:

Superfund site clean up, overseen by EPA, California Department of Health Services, etc. Complex and comprehensive drum handling safeguards and techniques were utilized. All waste was shipped in bulk quantities, minimizing unit costs.

Management Relevance:

Provided personnel in various disciplines.

Cost Relevance:

Project completed at bid price.

Past and Present Experience

Program Title:

EXCAVATION AND REMOVAL OF UNDERGROUND VAULTS
FOR FORD AUTO MANUFACTURING PLANT

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Ford Plant, Milipitas, CA	D4.060051	Fixed
	McLaren Hart	6.00	Price
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
11/92	\$101,908	\$101,908	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Mike Dzubnar	N/A	N/A	
McLaren Hart			
Irvine, CA			
714/756-2667			

Brief Description of Environmental Remediation Effort:

Performed predemolition decontamination activities for closing Ford Auto Plant. Drained and decontaminated over 300 underground vaults, machine pits, hydraulic sumps, and trenches. Cleaned areas previously containing oils, paints, thinners, water and debris. All areas cleaned and rendered non hazardous. All waste generated was consolidated, temporarily stored, and then shipped in bulk. Dismantled and removed below grade hydraulic hoists. Profiled transported and disposed of wastes.

Relevancy to Contract

Technical Relevance:

UPS provided comprehensive pre-demolition decontamination services. Confined space entries were required. High pressure washing of vaults and sumps enabled concrete to be removed and disposed of as construction waste. Decontaminated wastes generated were stored onsite and shipped in bulk to reduce costs.

Management Relevance:

All time schedules were met.

Cost Relevance:

All tasks were completed within original budget.

Past and Present Experience

Program Title: DECONTAMINATION OF 1.5 MILLION AND 1 MILLION GALLON UST

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Bethlehem Steel Vernon, CA		T&M
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
7/86	\$76,000	\$76,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
M. Villalobos Bethlehem Steel Vernon, CA 90058 310/325-8407	N/A	N/A	

Brief Description of Environmental Remediation Effort:

UPS drained, cleaned and decontaminated two major below ground concrete fuel vaults (1.5 million gallons and 1 million gallons) high pressure washed all surfaces. Performed tests on completed surfaces. Vacuum pumped all fluids and rinseate and removed all solids. Transported and disposed of all wastes.

Relevancy to Contract

Technical Relevance:

Major UST decontaminated. Confined space entry was required. Large surface areas cleaned in short time frame. Ventilated vaults to allow safe entry without supplied breathing air. UPS responsible for compliance with regulations. Fluids and rinseate recycled, lowering disposal costs.

Management Relevance:

Completed project in prescribed time frame.

Cost Relevance:

Final cost within original estimate.

Past and Present Experience

Program Title: UNDERGROUND STORAGE TANK REMOVAL
AND DISPOSAL

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Northrop Corp., Pico Rivera Facility	529247K	T&M
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
7/91	\$40,000	\$60,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
David Ramirez Northrop Corp. Pico Rivera, CA 310/942-5539	N/A	N/A	

Brief Description of Environmental Remediation Effort:

UPS has been awarded a number of Corrective operational support contracts with Northrop over a 10 year period. This 1991 task was performed in support of the closure and decommissioning of their aerospace R & D center in Pico Rivera. UPS obtained necessary permits. UPS sawcut the concrete cap and removed a 10,000 gallon underground storage tank. Excavation shoring was required and installed by UPS. Removed product tank, inspected and sampled open excavation, backfilled and compacted excavation, and replaced concrete. Transported and disposed of tank fluids, rinseate, and tank.

Relevancy to Contract

Technical Relevance:

UST excavations required shoring in conformance to OSHA. UPS developed a site specific health and safety plan and produced a closure report. UPS was responsible for all waste stream analysis. Inerting and degassing of UST was required during draining/decontamination.

Management Relevance:

Scope of work increased (larger than anticipated tank size, unanticipated tank removals, and shoring due to size and depth of tank and proximity to buildings.)

Cost Relevance:

The difference between the original contract value and the current total is based upon the expansion of the scope of work.

Past and Present Experience

Program Title: MILLION GALLON NAVY ABOVEGROUND STORAGE
TANK CLEAN-UP

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	U.S. Navy/General Dynamics Pomona, CA	7X-1083-8- 9/1	Fixed Price
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
1/92	\$49,458	\$49,458	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Ralph Contreras General Dynamics Corp. Pomona, CA 909/868-2425	N/A	N/A	

Brief Description of Environmental Remediation Effort:

As one of several consecutive operational support contracts at a Navy (GOCO) Ammunition Plant, UPS cleaned a million plus gallon above ground storage tank in a very short time period allowed use of dewatering and filter pressing. All liquids were decanted, filtered and discharged at customer's facility. Sludges were filter processed using portable equipment onsite. Effluent liquids were discharge at customer's facility. A small quantity of residual solids was disposed of offsite.

Relevancy to Contract

Technical Relevance:

UPS employed onsite treatment of contaminants, virtually eliminating the need for offsite disposal. Portable filter press utilized. UPS wrote and implemented a site specific Health and Safety Plan.

Management Relevance:

UPS complied with clients fast track time frame for this project. UPS coordinated its work with other contractors performing repair/construction work.

Cost Relevance:

Project completed as bid. Offsite disposal costs to the Navy were minimized.

Past and Present Experience

Program Title: Storm Drain Court Ordered District 7
Los Angeles County

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Department of Transportation State of California	07A0467	T&M
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
98-99	\$3,000,000	\$2,385,720	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Richard Crawford 2187 Riverside Drive Los Angeles, California 90039 Phone (213)620-3328	Richard Crawford 2187 Riverside Drive Los Angeles, California Phone (213)620-3328	Richard Navarro 2501 Pullman St. Santa Ana, Ca.	

Brief Description of Environmental Remediation Effort:

United was required to provide all equipment, devices, labor, personnel, materials and tools for: Traffic control, storm drain inlet cleaning, accumulation containers, sampling & classification for waste materials, transportation & disposal of waste materials and project management. This project required over 300 static freeway closures around the clock for six weeks. The contract also required the most heavy loaded 4,500 storm drain within the court ordered six week mandated time line. Transported & disposed of over 1,400 cubic yards of Hazardous Waste.

Relevancy to Contract

Technical Relevance:

All personnel were required to be trained & certified in the following: OSHA 1910.120 Hazwopper, Confined Space procedures, Chapter 8 Traffic Control, Bloodborne Pathogen and in a Medical Surveillance Program. Each accumulation site required a site specific treatment permit and NPDES discharge permit.

Management Relevance:

Complicated scheduling (cleaning operations had to be scheduled around peak traffic patterns). Waste material had to be sampled, classified, transported, and disposed of five days after accumulations.

Cost Relevance:

Finished on time, without accident, under budget.

Past and Present Experience

Program Title: Storm Drain Cleaning Contract District 8
Riverside & San Bernardino County

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Department of Transportation State of California	08A0025 A/1	T & M

Brief Description of Environmental Remediation Effort:

United was required to provide all equipment, devices, labor, personnel, materials and tools for: Traffic control, storm drain inlet cleaning, accumulation containers, sampling & classification of waste materials, transportation & disposal of wastematerials and project management. This project required over 100 static freeway closures per year. The contract required taking a sample every mile of all freeways in Riverside & San Bernardino counties and then return and remove the Hazardous Waste from the storm drains after the materials had been classified. The waste was then transported & disposed of properly.

Relevancy to Contract

Technical Relevance:

All personnel were required to be trained & certified in the following: OSHA 1910.120 Hazwopper, Confined Space procedures, Chapter 8 Traffic Control, Bloodborne Pathogen and in a Medical Surveillance program. Each accumulation site required a site specific treatment permit and NPDES discharge permit.

Management Relevance:

Complicated scheduling (cleaning operations had to be scheduled around peak traffic patterns). Waste material had to be sampled, classified, transported, and disposed of five days after accumulations.

Cost Relevance:

On-going work.

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Department of Transportation State of California	12A0064	T & M
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
98-00	\$2,400,000	\$2,400,000	
Client/Program Mgr.:	Administrator/Contract Officer	Contracting Officer:	
Lanny DeRose 2501 Pullman Street Santa Ana, Ca. 92705 Phone (949)724-2474	Lanny DeRose 2501 Pullman Street Santa Ana, Ca. 92705 Phone (949)724-2474	Richard Navarro 2501 Pullman Street Santa Ana, Ca.	
Brief Description of Environmental Remediation Effort:			

United was required to provide all equipment, devices, labor, personnel, materials and tools for: Traffic Control, storm drain inlet cleaning, accumulation containers, sampling & classification of waste materials, transportation & disposal of waste materials and project management. This project required over 100 static freeway closures per year. The contract required taking a sample every mile of all freeways in Orange county and then return and remove the Hazardous Waste from the storm drains after the materials had been classified. The waste was then transported & disposed of properly.

Relevancy to Contract

Technical Relevance:

All personnel were required to be trained & certified in the following: OSHA 1910.120 Hazwopper, confined space procedures, Chapter 8 Traffic Control, Bloodborne Pathogen and in a Medical Surveillance Program. Each accumulation site required a site specific treatment permit and NPDES discharge permit.

Management Relevance:

Complicated scheduling (cleaning operations had to be scheduled around peak traffic patterns). Waste material had to be sampled, classified, transported, and disposed of five days after accumulations.

Cost Relevance:

On-going work.

Program Title: ENVIRONMENTAL ASSESSMENT, GEOPHYSICAL DETECTION
AND WATER EXTRACTION WELL DRILLING WASTE REMOVAL

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.			Time & Material
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
Jan.-Dec. 1998		\$89,600	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Beylik Drilling, Inc.			

Brief Description of Environmental Remediation Effort:

United Pumping Service, Inc. performed multiple transportation services. Such as roll off container services for the containment and transportation of solid and heavy sludge material. Additionally vacuum trucks were utilized in the transportation of liquid waste. Waste was generated in the drilling process for multiple environmental assessment, geophysical detection and water extraction wells.

Relevancy to Contract

Technical Relevance:

Separation of solid and liquid waste attributed to major disposal cost savings, eliminating excessive solid surcharges on the liquid waste stream.

Management Relevance:

United Pumping Service, Inc. assisted customer in the analytical and profiling process of waste. Enabling customer to classify waste as non-hazardous and getting acceptance to local disposal sites.

local disposal sites.

Past and Present Experience

Program Title: SOLID MATERIAL EXTRACTION FOR THE PURPOSE OF
UPGRADING GAS STATIONS FOR NEW E.P.A. REGULATIONS

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.			Time & Material
Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
Jan.-Dec. 1998		\$157,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
H. B. Covey			

Brief Description of Environmental Remediation Effort:

United Pumping Service, Inc. performed heavy industrial vacuum (Guzzler/Vactor) truck services, utilized in the upgrading of many gas stations throughout California. Units extracted pea gravel, sand and dirt from around piping and tanks. Material was accessed and analyzed. If material was classified as hazardous it was placed in a United Pumping roll off container and transported for proper disposal.

Relevancy to Contract

Technical Relevance:

Utilizing United Pumping Service, Inc. industrial vacuum trucks eliminated the need removing the material with a backhoe which was much slower and had a high damage level factor to miscellaneous piping. Cost savings were substantial.

Management Relevance:

United Pumping Service, Inc. helped in the assessment of the situation and suggested to utilization of industrial vacuum trucks and roll off containers.

Cost Relevance:

Major overall cost savings to customer.

Past and Present Experience

Program Title: HAZARDOUS WASTE TRANSPORTATION/INDUSTRIAL
TANK CLEANING

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.			Time & Material

1998	Service Order	\$54,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Arcadia Architectural	N/A	N/A	

Brief Description of Environmental Remediation Effort:

Provide hazardous waste transportation of highly corrosive liquids and tank cleaning. Service included Level B PPE to remove sludge, pressure wash and tank line demolition of plating line.

Relevancy to Contract

Technical Relevance:

United Pumping Service, Inc. provided critical emergency response cleaning of tanks during maintenance with minimal down-time to plant operation

Management Relevance:

Cost Relevance:

Emergency Response completed 1 day, transportation service on-going.

Past and Present Experience

Program Title: HAZARDOUS WASTE MANAGEMENT/TRANSPORTATION

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	Internal Services Div. Co. of L.A. LAC/USC Medical		Time & Material
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
1991 To Date	\$50,000	\$360,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
LAC/USC Medical Center	N/A	N/A	

Brief Description of Environmental Remediation Effort:

United Pumping Service, Inc. provides management of USC Medical Center's waste needs. UPS service includes bulking of waste liquids from various floors throughout center, lab packing, waste segregation and identification. Vacuum truck service of waste oils/waters, excavation of contaminated soils. Tank pressure wash and clean bio-hazardous waste round-up and package. Emergency Response.

Relevancy to Contract

Technical Relevance:

Management Relevance:

United has expanded its service to the needs of the hospital since 1991. United has handled turnkey nearly all waste issues for USC where as USC has received excellent ratings during auditing since 1991.

Cost Relevance:

Project constant and on-going.

Past and Present Experience

Program Title: FIELD EMERGENCY RESPONSE

Contract Data

Company/Division Name:	Contracting Agency:	Contract No.	Contract Type:
United Pumping Service, Inc.	City of Los Angeles Safety Kleen		Time & Material
Period of Performance for this task:	Original Contract/Task Value:	Current Contract/Task Value	
1997 to Date	Open	\$330,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
Safety Kleen	N/A	N/A	

Brief Description of Environmental Remediation Effort:

United Pumping Service, Inc. has performed emergency response service for spills and waste removal. Service includes waste identification, segregation, remediation and lab packaging of abandoned waste, vacuum truck service for bulk liquids and roll-off containment for solids. Traffic incidents where waste fuels are leaking on both surface and freeways/highways.

Relevancy to Contract

Technical Relevance:

Management Relevance:

United has managed and performed Emergency Response service at multiple sites at the concurrently. United consistently deals with all environmental agencies including, City Fire Dept. Dept. of Health Services, Fish and Game, AQMD, EPA and OSHA

Relevance:

Past and Present Experience

Period of Performance for this task:	Original Contract/Tank Value:	Current Contract/Task Value	
1994 To Date	\$14,000	\$140,000	
Client Program Mgr.:	Administrator Contract Officer	Contracting Officer:	
CH2M Hill	N/A	N/A	

Brief Description of Environmental Remediation Effort:

United Pumping Service, Inc. performed hazardous waste transportation for MTA Greenline. The service has expanded from simple vacuum truck service to excavation of 400 tons of contaminated soil. Confined space entry to clean 6/21K gallon tanks full of sediment. Removal of 40 yards of sludge from tunnel construction 80 feet below grade. De-contaminates and removed above ground treatment system including removal of all connecting piping and clarifiers. Emergency response of hazardous waste spills.

Relevancy to Contract

Technical Relevance:

Consolidated soil drums and bulk liquids to provide economical disposal cost on 100's of drums. Provided entire labor force and vector equipment to remove sludge/mud from flooring of Greenline tunnel 1 month work of tunnel down time done in 3 days providing MTA minimal downtime and tremendous cost savings.

Management Relevance:

Cost Relevance:

Most projects completed, service on-going

CONCLUSION

Throughout this statement of qualifications, we have shown that United Pumping Service, Inc. is a fully qualified, hazardous waste and remediation contractor. With a background of 33 years in hazardous waste and 19 years in solving clients remedial action problems, U.P.S. brings extensive "hands on" experience to each project.

U.P.S. has successfully completed more than 900 remediation and/or emergency response projects for clients in petroleum, chemical, aerospace, heavy manufacturing, and the public sector. U.P.S. has established a track record of bringing in projects on time and within budget.

United's success is due in large part to it's ability to maintain contracts with many customers (particularly aerospace firms) for extended terms. The company's success in this area is due to United's ability to maintain a superior level of service. United has maintained many of it's clients for as long as 15 to 20 years through it's commitment to satisfying the customer.

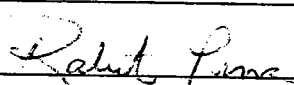

Thus, United Pumping Service, Inc.'s hands on experience, technical expertise and practical know-how assure sound performance of hazardous waste and remediation activities for your company or client. United Pumping Service, Inc. is clearly your best choice to help meet your hazardous waste and remediation needs.

FOR

AS-NEED EMERGENCY REMOVAL OF HAZARDOUS MATERIAL

The undersigned Proposer offers to perform the work described in the Request for Proposals for the following price(s). The Proposer shall furnish all labor, materials, transportation, taxes, equipment, and supplies unless stated otherwise in the Request for Proposals. It is understood and agreed that where quantities, if any, are set forth in the Schedule of Prices, they are only estimates, and that the unit prices quoted, if any, will apply to the actual quantities, whatever they may be.

Rented equipment, laboratory fees, and dump fees will be paid on an actual cost basis plus a 10% processing/handling fee provided receipts are provided. These costs shall not be included in the Proposal price.

**COUNTY OF LOS ANGELES CONTRACTOR EMPLOYEE JURY SERVICE PROGRAM
APPLICATION FOR EXCEPTION AND CERTIFICATION FORM**

This contract is subject to the County of Los Angeles Contractor Employee Jury Service Program (Program) (Los Angeles County Code, Chapter 2.203). All contractors and subcontractors must complete this form to either (1) request an exception from the Program requirements or (2) certify compliance. Upon review of the submitted form, the County department will determine, in its sole discretion, whether the bidder or proposer is excepted from the Program.

Company Name:	United Pumping Service, Inc.		
Company Address:	14000 E. Valley Blvd.		
City:	Industry	State:	CA Zip Code: 91746
Telephone Number:	626/ 961-9326		
(Type of Goods or Services):	As-Needed Emergency Removal of Hazardous Material		

If you believe the Jury Service Program does not apply to your business, check the appropriate box in Part I (you must attach documentation to support your claim). If the Jury Service Program applies to your business, complete Part II to certify compliance with the Program. Whether you complete Part I or Part II, sign and date this form.

Part I: Jury Service Program Is Not Applicable to My Business

☐ My business does not meet the definition of "contractor," as defined in the Program as it has not received an aggregate sum of \$50,000 or more in any 12-month period under one or more County contracts or subcontracts (this exception is not available if the contract/purchase order itself will exceed \$50,000). I understand that the exception will be lost and I must comply with the Program if my revenues from the County exceed an aggregate sum of \$50,000 in any 12-month period.

☐ My business is a small business as defined in the Program. It 1) has ten or fewer employees; and, 2) has annual gross revenues in the preceding twelve months which, if added to the annual amount of this contract, are \$500,000 or less; and, 3) is not an affiliate or subsidiary of a business dominant in its field of operation, as defined below. I understand that the exemption will be lost and I must comply with the Program if the number of employees in my business and my gross annual revenues exceed the above limits.

"Dominant in its field of operation" means having more than ten employees, including full-time and part-time employees, and annual gross revenues in the preceding twelve months, which, if added to the annual amount of the contract awarded, exceed \$500,000.

"Affiliate or subsidiary of a business dominant in its field of operation" means a business which is at least 20 percent owned by a business dominant in its field of operation, or by partners, officers, directors, majority stockholders, or their equivalent, of a business dominant in that field of operation.

☐ My business is subject to a Collective Bargaining Agreement that expressly provides that it supersedes all provisions of the Program. **ATTACH THE AGREEMENT.**

Part II: Certification of Compliance

☒ My business has and adheres to a written policy that provides, on an annual basis, no less than five days of regular pay for actual jury service for full-time employees of the business who are also California residents, or my company will have and adhere to such a policy prior to award of the contract.

I declare under penalty of perjury under the laws of the State of California that the information stated above is true and correct.

I, Robert Pina

- ☐ sole owner
☐ general partner
☐ managing member
☒ President, Secretary, or other proper title) Sales Manager

of United Pumping Service, Inc.

Name of proposer

make this certification in support of a proposal for a contract with the County of Los Angeles for services within the scope of Los Angeles County Code Section 2.180.010, which provides as follows:

Contracts Prohibited. A. Notwithstanding any other section of this code, the county shall not contract with, and shall reject any bid or proposal submitted by, the persons or entities specified below, unless the board of supervisors finds that special circumstances exist which justify the approval of such contract.

1. Employees of the county or of public agencies for which the board of supervisors is the governing body;
2. Profit-making firms or businesses in which employees described in subdivision 1 of subsection A serve as officers, principals, partners, or major shareholders;
3. Persons who, within the immediately preceding 12 months, came within the provisions of subdivision 1 of subsection A, and who:
 - (a) Were employed in positions of substantial responsibility in the area of service to be performed by the contract; or
 - (b) Participated in any way in developing the contract of its service specifications; and
4. Profit-making firms or businesses in which the former employees described in subdivision 3 of subsection A, serve as officers, principals, partners, or major shareholders.

I hereby certify I am informed and believe that personnel who developed and/or participated in the preparation of this contract do not fall within scope of Code Section 2.180.010 as cited above. Furthermore, that no County employee whose position in the County enables him/her to influence the award of this contract, or any competing contract, and no spouse or economic dependent of such employee is or shall be employed in any capacity by the Contractor herein, or has or shall have any direct or indirect financial interest in this contract. I understand and agree that any falsification in this Certificate will be grounds for rejection of this Proposal and cancellation of any contract awarded pursuant to this Proposal.

I certify under penalty of perjury under the laws of California that the foregoing is true and correct.

Signed Robert PinaDate Nov. 8, 2005

COUNTY OF LOS ANGELES

Policy on Doing Business With Small Business

Forty-two percent of businesses in Los Angeles County have five or fewer employees. Only about four percent of businesses in the area exceed 100 employees. According to the Los Angeles Times and local economists, it is not large corporations, but these small companies that are generating new jobs and helping move Los Angeles County out of its worst recession in decades.

WE RECOGNIZE...

The importance of small business to the County:

- In fueling local economic growth.
- Providing new jobs.
- Creating new local tax revenues.
- Offering new entrepreneurial opportunity to those historically under-represented in business.

The County can play a positive role in helping small business grow:

- As a multi-billion dollar purchaser of goods and services.
- As a broker of intergovernmental cooperation among numerous local jurisdictions.
- By greater outreach in providing information and training.
- By simplifying the bid/proposal process.
- By maintaining selection criteria which are fair to all.
- By streamlining the payment process.

WE THEREFORE SHALL:

1. Constantly seek to streamline and simplify our processes for selecting our vendors and for conducting business with them.
2. Maintain a strong outreach program, fully coordinated among our departments and districts, as well as other participating governments to: (a) inform and assist the local business community in competing to provide goods and services; and, (b) provide for ongoing dialogue with and involvement by the business community in implementing this policy.
3. Continually review and revise how we package and advertise solicitations, evaluate and select prospective vendors, address subcontracting, and conduct business with our vendors, in order to: (a) expand opportunity for small business to compete for our business; and, (b) to further opportunities for all businesses to compete regardless of size.
4. Ensure that staff who manage and carry out the business of purchasing goods and services are well-trained, capable, and highly motivated to carry out the letter and spirit of this policy.

TYPES OF MATERIALS WHICH UNITED IS QUALIFIED AND WILLING UPON REQUEST TO HANDLE:

United Pumping Service, Inc. is licensed to remove and transport most categories of hazardous materials, excluding radioactive materials, explosives, and pressurized oxidizing gases such as Fluorine, Chlorine, as well as Anhydrous Ammonia.

UNITED'S CAPABILITY AND EXPERIENCE IN THE HANDLING OF HAZARDOUS MATERIALS:

United Pumping Service, Inc., possesses over thirty years experience in the handling of hazardous materials on an every day basis. We have performed under contract for the State of California Department of Transportation for eighteen years. Our entire spill crew is trained in procedures relating to the safe handling of hazardous materials, and has been trained, medically monitored, certified in respiratory protection, confined space entry, and CPR.

United Pumping Service, Inc., owns substantial equipment commonly used in performing emergency spill cleanups. This includes a complete range of vacuum trucks, roll-off trucks, loaders, washing equipment, safety equipment and so on.

GOVERNMENTAL PERMITS/LICENSES POSSESSED BY UNITED RELEVANT TO HANDLING AND DISPOSAL OF HAZARDOUS MATERIALS.

See Attachment A (Page 4)

TYPES OF EQUIPMENT OWNED BY UNITED:

See Attachment B (Pages 5-7)

UNITED HAS ANALYTICAL FACILITIES FOR ON-SITE IDENTIFICATION OF SUBSTANCE:

United Pumping Service, Inc., has the capability to determine ignitability, corrosiveness, certain reactivity parameters, etc., on site; by way of Hazcat (TM) test method. We also have analytical chemists available as they may be needed.

LABORATORY CAPABILITIES:

Extensive and elaborated analysis is available with several prominent EPA and CAL-EPA approved commercial laboratories.

DISPOSAL CHARGES:

Disposal fees are billed to the customer at cost plus 10% Service Charge.

CHARGES:

All charges are computed on a portal to portal basis from our City of Industry Terminal. A four hour minimum applies to all equipment and personnel called out.

HOLIDAYS:

On the following holidays, there will be an additional charge of \$50.00 per man hour.
