

Notice of Determination

To: Registrar-Recorder/County Clerk
County of Los Angeles
12400 East Imperial Highway, Room 1101
Norwalk, CA 90650

From: County of Los Angeles
Department of Public Works – Stormwater Planning Division
Attention: Matthew Frary, PE
900 South Fremont Avenue
Alhambra, CA 91803-1331

Lead Agency: Los Angeles County Flood Control District (District)

State Clearinghouse (SCH) No. 2002111051

Project Title: Sun Valley Watershed Management Plan: Rory M. Shaw Wetlands Park Project and Upper Storm Drain System Phases 2 through 4 Project

Project Location: The proposed Rory M. Shaw Wetlands Park Project (Park project) and the proposed Sun Valley Watershed Upper Storm Drain System project (Drain project) are located in the Sun Valley Community within the City of Los Angeles, approximately 14 miles northwest of downtown Los Angeles in the northeastern portion of San Fernando Valley. See Figure 1.

The Park project site is a 46.62-acre lot bounded by Strathern Street to the south, Tujunga Avenue to the west, Fair Avenue to the east, industrial operations and a barren field to the north. The Drain project is located along San Fernando Road, Tuxford Street, Glenoaks Boulevard, Sheldon Street, Vineland Avenue, Tujunga Avenue, and Saticoy Street. Phase 2 would be installed northeast of the Park project (Penrose Street, San Fernando Road, Tuxford Street, Norris Avenue, Bradley Avenue, De Garmo Avenue, Glenoaks Boulevard, Peoria Street, Pendleton Street, and Randall Street), Phase 3 would be constructed northwest of the Park project (Sheldon Street and San Fernando Road), and Phase 4 would be located south of the Park project (Tujunga Avenue and Saticoy Street).

Project Description:

The Sun Valley Watershed Management Plan (SVWMP) Program Environmental Impact Report (2004 PEIR) was certified by the Los Angeles County Board of Supervisors as governing body of the District on June 29, 2004, and outlined multiple projects including the Park project (previously named the Strathern Pit Multiuse Project) and Drain project, each designed to manage stormwater runoff and reduce flooding. The Addendum to the 2004 PEIR evaluates proposed updates to these two projects and concludes that the two projects did not constitute a substantial change or result in new significant impacts or an increase in the severity of a previously identified impact or substantial new information pursuant to State CEQA Guidelines section 15162.

The Park project includes conversion of a 46-acre, non-operating inert construction debris landfill into a constructed wetlands park that would provide flood control, habitat, recreation, and water quality enhancements to the Sun Valley community, including a 21-acre detention pond,

THIS NOTICE WAS POSTED

ON October 27 2025

UNTIL November 26 2025

REGISTRAR – RECORDER/COUNTY CLERK

The Park project includes conversion of a 46-acre, non-operating, inert construction debris landfill into a constructed wetlands park that would provide flood control, habitat, recreation, and water quality enhancements to the Sun Valley community, including a 21-acre detention pond, 10 acres of wetlands, and 15 acres of recreational space. The Park project was also analyzed in a previously certified 2013 Addendum to the SVWMP EIR.

The Drain project includes installation of storm drain lines below existing roads in the Sun Valley area. Phases 2 through 4 involve the installation of approximately 28,200 linear feet of storm drain lines below existing roads in the Sun Valley area, as well as the installation of catch basins, connector pipes, and other drainage structures. The Drain project was also analyzed in previously certified Addenda to the SVWMP Environmental Impact Report in 2013 and 2020.

Name of Public Agency Approving Project: Los Angeles County Flood Control District

This is to advise that on October 21, 2025, the Los Angeles County Flood Control District, as a Responsible Agency for the project, has made the following determinations regarding the project:

1. The Park and Drain projects will have a significant effect on the environment.
2. A PEIR was prepared for the Park and Drain projects pursuant to the provisions of CEQA.
3. Mitigation measures were made as a condition of the approval of the Park and Drain projects.
4. A mitigation reporting or monitoring plan was prepared for the Park and Drain projects.
5. A Statement of Overriding Considerations was prepared for the Park and Drain projects.
6. Findings were made pursuant to the provisions of CEQA.

The location of the documents and other materials constituting the record upon which the District decision is based in this matter can be found here:

Los Angeles County Flood Control District, 900 South Fremont Avenue, 11th Floor, Alhambra, CA 91803.

The Sun Valley Watershed Upper Storm Drain System Project is located in the Sun Valley Community within the City of Los Angeles, approximately 14 miles northwest of downtown Los Angeles in the northeastern portion of San Fernando Valley. The Project is comprised of four “phases” collectively known as the Sun Valley Watershed Upper Storm Drain System. Phase 1 includes the construction of reinforced concrete pipes, catch basins, connector pipes, and other drainage structures. Construction would primarily take place along Tujunga Avenue, Penrose Street, and Gross Street. Phase 2 would construct reinforced concrete pipes, catch basins, connector pipes, and other drainage structures primarily along San Fernando Road, Tuxford Street, Glenoaks Boulevard, and Sheldon Street. Phase 3 would include construction of reinforced concrete pipes, catch basins, connector pipes, and other drainage structures primarily along San Fernando Road and Sheldon Street. Phase 4 would construct a 66-inch reinforced concrete pipe and 2.5-ft x 10.5-ft reinforced concrete box that directs overflow from the detention basin within the Rory M. Shaw Wetlands Park to outlet onto Project 39. Construction would primarily take place on Vineland Avenue, Tujunga Avenue and Saticoy Street.

The Los Angeles County Flood Control District (LACFCD) adopted the Sun Valley Watershed Management Plan (SVWMP) and the SVWMP Programmatic Environmental Impact Report (2004 PEIR) on June 29, 2004. The SVWMP identified 18 Best Management Practice projects that focus on flood protection, increased water conservation, improved water quality, increased habitat restoration, and enhanced recreational opportunities. In 2013, an addendum to the 2004 PEIR was prepared to address minor changes for two components of the SVWMP including the Strathern Pit and the Storm Drain components (2013 Addendum). Including the Strathern Pit project’s name change to the Rory M. Shaw Wetlands Park project. The 2013 Addendum concluded that the project modifications would not result in any new significant effect on the environment that were not identified in the 2004 PEIR.

Since the adoption of the 2013 Addendum, the Storm Drain component of the project has been further modified. To address these modifications, CEQA provides that an addendum to an EIR shall be prepared if none of the conditions described in Sections 15162 and 15163 of the CEQA Guidelines calling for a Subsequent or Supplemental EIR have occurred. The 2004 PEIR found that on the basis of the whole record before the Board that the significant adverse effects of the project have either been reduced to an acceptable level or are outweighed by the specific considerations of the project as outlined in the Findings of Fact and Statement of Overriding Considerations in accordance with the provisions of the CEQA. The Sun Valley Watershed Upper Storm Drain System Phase 1 project has been reviewed by the District in light of Sections 15162 and 15163 of CEQA Guidelines. As CEQA Lead Agency, the District has determined, based on the analysis of the project, none of the conditions apply which would require preparation of a Subsequent or Supplemental EIR and that an addendum to the certified SVWMP 2004 PEIR is the appropriate environmental documentation under CEQA for the recent modifications.

In accordance with Sections 15162 and 15164(a) of CEQA Guidelines, the November 2020 Addendum to the 2004 PEIR was prepared since there are only minor technical changes or additions that did not result in any new significant effect on the environment not included in the previously adopted 2004 PEIR. The changes are identified in the November 2020 Addendum. There are no changes to the project or to the circumstances under which the project is undertaken that requires further review under CEQA.

**ADDENDUM TO A PROGRAM ENVIRONMENTAL IMPACT REPORT (PEIR)
SUN VALLEY WATERSHED MANAGEMENT PLAN**

Original PEIR SCH 2002111051 approved June 29, 2004

The project proposes to convert a former 46-acre landfill in the Sun Valley Community of the City of Los Angeles into a multi-purpose wetlands park that collects storm water through 4.5 miles of new storm drains to reduce flooding and to naturally treat and remove pollutants from runoff from 929 acres of the surrounding area. The project creates 10 acres of wetlands and approximately 15 acres of recreational area, extends the recycled water line from the Los Angeles Department of Water and Power Valley Steam Plant from Truesdale Street primarily in the trench excavated for the new storm drains along Glenoaks Boulevard and Tuxford Street to Tujunga Avenue to irrigate park landscaping, and conveys treated runoff to Sun Valley Park for groundwater recharge.

The Strathern Wetlands Park Project, renamed the Rory M. Shaw Wetlands Project, is composed of the approved Strathern Pit and Storm Drain described in the Programmatic Environmental Impact Report (PEIR) for the Sun Valley Watershed Management Plan (SVWMP). The PEIR included mitigation measures to protect biological resources including site surveys, preconstruction protocol surveys, monitoring, and consultation with regulatory agencies. The PEIR also contained mitigation measures to protect cultural resources including site investigation, evaluation of historic or cultural eligibility of potential resources on site, monitoring during initial subsurface work, work stoppage, and consultation with Native American parties or the Coroner upon discovery. The mitigation measures are included in the Addendum. No new mitigation measures are required.

This Addendum addresses the addition of the recycled waterline, rerouting of 0.4 mile of storm drain, and construction of 1,200 feet of transfer pipeline to the Strathern Pit and Storm Drains components of the SVWMP. This Addendum also addresses the project level impacts of the recycled waterline specific alignment as required by the City of Los Angeles Integrated Resource Plan Program EIR which addressed expansion of recycled water distribution at the program level.

An initial study for the project scope changes was conducted on the environmental factors evaluated in the 2004 PEIR and the 2012 CEQA Guidelines. Minor technical changes related to Air Quality, Biological Resources, Cultural Resources, Greenhouse Gases, Traffic, and Growth Inducing Impact were incorporated to the PEIR. The remaining environmental factors discussed in the PEIR were unaffected.

Air Quality impact remains significant but reduced due to the reduction in length of the drain, transfer pipeline, and incorporation of the recycled waterline into the drain trench. Biological Resource surveys indicated low value habitat and limited potential wildlife impact. PEIR Mitigation measures will be implemented for preconstruction surveys, feasible avoidance and restoration, and agency consultation. Cultural Resource surveys detected four structures over 50 years old that were evaluated and found not eligible for the California Register of Historic Resources or as historic CEQA resources. Greenhouse Gas impact to global climate change did not exceed the interim significance threshold of the South Coast Air Quality Management District for stationary sources. Traffic impact was reduced due shorter street trenching for the drain, transfer pipeline, and recycled waterline. Growth inducing impacts from the expansion of recycled water distribution was evaluated by the Integrated Resource Plan PEIR. Significant growth inducing impacts were not anticipated.

Project Description:

The proposed project is a watershed management plan, which provides a blueprint for a multi-purpose flood control program to solve the local flooding problem in the Sun Valley Watershed area while increasing water conservation, recreational opportunities, and wildlife habitat, and reducing stormwater pollution. Implementation of the Watershed Management Plan will include construction of various stormwater facilities within the watershed, both small- and large-scale, including those for: retention and/or infiltration, conveyance, and distribution for reuse.

This is to advise that the County of Los Angeles Board of Supervisors as the Governing Body of the County Flood Control District
