While we cannot gather physically like the first Earth Day in 1970, we can gather at home to enact lasting change to preserve our environment. We encourage everyone to keep our environment clean and healthy every day with the following resources:

**Learn how to make a sustainable home:**
- Visit CleanLA.com to learn more about the 4R’s (reduce, reuse, recycle and rethink) and implement sustainable changes in your home.
- Celebrate with these 5 Ways to Save the Planet (and Entertain the Kids) While Staying Home provided by CalRecycle.
- Visit Metropolitan Water District’s website for tips on how to reduce your home’s water consumption.

**Start a native, water-wise garden and compost your food scraps:**
- Our Smart Gardening program shows you how to start a water-wise garden and backyard composting.
- Find out what plants are native to your area by searching California Native Plant Society’s database.

**Check out educational resources and activities for your children:**

**Grades K through 3:**
- Teach your children how they can protect the environment with lesson plans and activities from our Environmental Defenders program.

**Grades K through 6:**
- Meet the Environmental Defenders and go on a virtual music tour to Rock the Planet.

**Grades K through 9:**
- Play fun games, quizzes and videos through the Environmental Protection Agency.

**All Ages:**
- Go on a virtual field trip with The Metropolitan Water District.

To learn more about Earth Day and to participate in digital events, such as Earth Day Live 2020, visit Earthday.org.
