Free Webinar on Public Funding Resources
for Recycling Manufacturers

January 25, 2021

9am – 2:30pm

CalRecycle has lined up various public funding resources to help support recycling manufacturing in California, including reuse projects, edible food recovery, intermediate and secondary recycling manufacturing, in-vessel digestion, and composting. Feedstock for manufacturing covers a wide range of materials, including edible food, food waste, green waste, lumber, C&D materials, and recycled fibers, plastics, glass, and metals. Additionally, a few recycled product manufacturers that have utilized some of the funding resources will share their experiences to give you real life examples!

*CalRecycle is hosting a webinar on private funding resources in February 2021 stay tuned for details
