COUNTYWIDE PLAN
WATER AND WASTEWATER ELEMENT

INDEX OF
SOLID WASTE AND LIQUID INDUSTRIAL WASTE
DISPOSAL SITES
FOR
630 SERIES COORDINATE BASE MAPS

COUNTY OF LOS ANGELES
DEPARTMENT OF COUNTY ENGINEER
PROJECT PLANNING AND POLLUTION CONTROL DIVISION

October, 1976
The attached Series 630 Maps (1" = 2000') contain the following information for the management of the disposal of solid wastes and liquid industrial wastes:

I. Active, planned and potential landfills, transfer stations and special facilities are identified on the maps. This includes privately operated sites and sites operated by governmental agencies, as well as budgeted new support facilities and special studies.

II. Certain types of liquid industrial wastes when approved by proper authorities may be discharged through sewers and natural drainage facilities. These facilities are not included on these maps.

III. Inactive landfills are identified on the maps. These include completed sites and incompleted sites that are currently closed.

IV. Administration of collection service for household refuse is identified: municipal collection, garbage disposal districts, collection for franchise areas, collection where cities contract for services, and private collection by licensed haulers.

V. The index map (1" = 2 miles) entitled "Countywide Waste Management Plan," indicates the approximate location of all active, planned, and potential waste disposal facilities, and the administration of collection service provided within the cities that collect their own refuse, and garbage disposal districts.

VI. The index map (1" = 4.5 miles) accompanying the 630 series maps illustrates the approximate area covered by each sheet of the maps.
