April 1, 2019

The Honorable Lorena Gonzalez, Chair
Assembly Committee on Appropriations
State Capitol, Room 2114
Sacramento, California 95814

Dear Assembly Member Gonzalez:

**SUPPORT – ASSEMBLY BILL 142 (CRISTINA GARCIA) AS AMENDED ON
FEBRUARY 25, 2019 – LEAD-ACID BATTERIES**

The Los Angeles County Solid Waste Management Committee/Integrated Waste Management Task Force (Task Force) **supports** Assembly Bill 142 (AB 142), as amended on February 25, 2019. If enacted, the proposed legislation, among other things, would:

- Effective April 1, 2022, increases the California Battery Fee on purchase of a replacement lead battery from \$1.00 to \$2.00.
- During the period of April 1, 2017 until April 1, 2022, maintains a \$1.00 fee imposed on a manufacture of each lead-acid battery sold at retail in California. Effective April 1, 2022, the lead- acid Battery Manufacture Fee will increase to \$2.00 in perpetuity. A manufacturer is defined as a person who manufactures the lead-acid battery and who sells, offer to sale, or distribute the lead-acid battery in the State. If no person stated above is subject to the State's jurisdiction, then the manufacturer is responsible for payment of the said fee to the State.
- Funds from both fees are currently allocated to the State Department of Toxic Substances Control (DTSC). The funds are used by DTSC for investigation, site evaluation, cleanup, removal, monitoring or other response actions at any areas in the State that may have been contaminated by the operation of a lead-acid battery recycling facility (Currently there are two lead-acid facility in Los Angeles County, Exide Technologies facility in Vernon [currently closed] and Quemetco, Inc. recycling facility in the unincorporated areas adjacent to the City of Industry). Exide facility is currently undergoing cleanup activities via a \$176.6 M loan/funding from State General Fund to DTSC.

The proposed legislation will maintain the current funding allocation for the cleanup activities. However, it will not provide any funds toward repayment of the Exide \$176.6 M cleanup fund until such time as all lead-acid battery recycling sites in California are investigated and cleanup activities are completed.

The Honorable Lorena Gonzalez

April 1, 2019

Page 2

The Task Force strongly supports the proposed legislation because it would continue the state efforts to clean up all contaminated lead-acid battery sites, and to protect these sites' neighboring residents and children. Additionally, the proposal provides for a permanent revenue source to provide for the cost of cleanup activities.

Pursuant to Chapter 3.67 of the Los Angeles County Code and the California Integrated Waste Management Act of 1989 (Assembly Bill 939), the Task Force is responsible for coordinating the development of all major solid waste planning documents prepared for the County of Los Angeles and the 88 cities in Los Angeles County with a combined population in excess of ten million. Consistent with these responsibilities and to ensure a coordinated and cost-effective and environmentally sound solid waste management system in Los Angeles County, the Task Force also addresses issues impacting the system on a countywide basis. The Task Force membership includes representatives of the League of California Cities-Los Angeles County Division, County of Los Angeles Board of Supervisors, City of Los Angeles, waste management industry, environmental groups, the public, and a number of other governmental agencies.

Based on the foregoing, the Task Force **supports** AB 142. If you have any questions, please contact Mr. Mike Mohajer, a member of the Task Force, at MikeMohajer@yahoo.com or at (909) 592-1147.

Sincerely,

Margaret Clark, Vice-Chair
Los Angeles County Solid Waste Management Committee/
Integrated Waste Management Task Force and
Mayor Pro Tem, City of Rosemead
