Mr. Scott Tignac
Waste Management, Inc.
1211 Gladstone Street
Azusa, CA 91702

Dear Mr. Tignac:

FINDING OF CONFORMANCE
AZUSA LAND RECLAMATION, 1211 WEST GLADSTONE STREET, AZUSA
SOLID WASTE FACILITY PERMIT NO. 19-AA-0013

The Azusa Land Reclamation Company Landfill's had submitted a request for a Finding of Conformance (FOC) with the Los Angeles County Countywide Siting Element (CSE). The request was considered by the Los Angeles County Solid Waste Management Committee/Integrated Waste Management Task Force (Task Force) at its September and October 2014 meetings. A number of deficiencies were identified with the request for the FOC, and you were advised of those deficiencies that were to be provided to the Task Force for its consideration at its November 20, 2014, meeting.

On November 17, 2014, as an additional attempt to be provided with the needed information, the Task Force staff forwarded you an e-mail request for additional information to address the deficiencies. Subsequently, a Task Force letter dated January 14, 2015, was sent to you to reiterate the request for the following additional information in order to process the request for the FOC:

- Revised Figure 2 "Zone Boundaries of the Azusa Landfill" and Figure 3 "Disposal Locations for Asbestos Waste, Shredded Tires, and Inert Waste," depicting the exit from the Landfill, and the access to the recently developed MRF/Transfer Station, owned and operated by Waste Management, Inc.
- Revised Figure 6 "Land Use Map" and Figure 7 "Aerial Photograph" showing street names.
- Certified Initial Study/Environmental Checklist & Addendum to the 1988 Negative Declaration.
- Final contour elevation as approved as part of Resolution 90-14 issued by the City of Azusa Regional Planning Commission.

- Any land use entitlement/permits issues by the City of Irwindale considering a portion of the Landfill is located within the City of Irwindale.
- An up-to-date 2014 site map showing the limit of fill to scale, as well as the surrounding land uses in the area.
- Detailed descriptions and/or drawings regarding past and present activities in close proximity to the groundwater.
- Traffic queuing analysis to demonstrate there is sufficient space within Azusa Land Reclamation (ALR) Company's property to accommodate traffic on-site and prevent off-site queuing.
- Information and status of the 1996 Corrective Action Plan (CAP) for Zone 1 of the Landfill.
- Clarification on a statement contained in ALR's FOC Proposal (page 3, first paragraph) stated, "A maximum of 8,000 tons per day and 39,000 tons per week of material can be accepted at the Azusa Landfill." The Revised Solid Waste Facility Permit indicated "The facility shall not receive more than the maximum permitted daily tonnage of 8,000 tons per day of solid waste, not to exceed 39,000 tons per week without a revision of this permit." For consistency, this statement needs to be clarified or revised to "A maximum of 8,000 tons of solid waste per day, not to exceed maximum of 39,000 tons of solid waste per week, can be accepted at the Azusa Landfill."

Pursuant to The Countywide Siting Element, a solid waste management "disposal" planning document, which has been developed pursuant to the California Integrated Waste Management Act of 1989 (Assembly Bill 939, 1989), requires new solid waste disposal facilities, expansions of existing solid waste disposal facilities or existing solid waste disposal facilities that institute a significant change to their operation to obtain an FOC with the Countywide Siting Element from the Task Force. The Countywide Siting Element was approved by a majority of cities (including Cities of Azusa and Irwindale) in the County of Los Angeles containing a majority of the cities' population, the County Board of Supervisors, and the former California Integrated Waste Management Board on June 24, 1998. The purpose of the FOC is to ensure that any new and/or expansions of solid waste disposal facilities in Los Angeles County, including the cities and unincorporated communities, are consistent with the Countywide Siting Element and its siting criteria to ensure public health and safety and the environment.

At this time, the Task Force has yet to receive the required information/documents. Therefore, the facility's owner/operator is required to provide the missing information to enable the Task Force to carry out its responsibilities in relation to the FOC process as required by the Countywide Siting Element.

Mr. Scott Tignac
