

**Sustainable
Investment To
Ensure**

**Reliable Water
Service For**

Antelope Valley

**OUR
GOAL:**

To provide reliable, high-quality water and responsive customer care in a cost-effective, sustainable, and environmentally responsible manner.

Water is essential to every part of our daily lives. We drink it, cook with it, clean with it, bathe in it, and we even play in it!

A properly maintained water system is essential for your health and well-being.

FACT!

Bi-monthly water bills help cover the costs of operations, repairs, and maintenance to keep water service reliable for District customers.

Los Angeles County Public Works, on behalf of the Los Angeles County Waterworks Districts, provides services that ensure its customers in the **Antelope Valley** have safe, clean, and reliable water. Los Angeles County Waterworks District 40, Antelope Valley has been providing reliable, high-quality water and responsive customer care to the region since 1919.

We are making long-term investments to ensure that our water system is well maintained. It's been two decades since the last general rate increase for Waterworks District 40, Antelope Valley.

To keep up with rising costs and maintain reliable service, Public Works is proposing a water rate increase for 2026.

How You Can Participate:

- **Attend a community information session:** Check our website for updates.
- **Attend the Public Hearing:** Date and meeting information will be available on the website and in a mailed public notice.
