

## **Antelope Valley Integrated Regional Water Management Plan Technical Advisory Committee (TAC) Meeting**

Date March 28<sup>th</sup>, 2007, 1 pm – 5 pm  
Larry Chimbole Cultural Center,  
38350 Sierra Highway, Palmdale, CA

### **Meeting Agenda**

#### Introductions

- Purpose of the TAC
  - Number of issues raised concerning the water budget elements in the AV IRWMP Section 3
  - Want to reach broad consensus about how to represent elements within the regional water budget so we can move forward with the Plan
  - The TAC will provide the larger Stakeholder group with technical recommendations; the recommendations will be incorporated into the Plan
- Review schematic representation of the regional water budget schematic (as presented in stakeholder meetings)
- Describe available data and background materials to support the water budget analysis
- TAC Method
  - Review each element of the water budget; identify key areas of concern within the TAC
    - Natural recharge
    - Agricultural water demand
      - Current irrigated acreage
      - Water use factors
    - Return flow
  - Review comments and issues raised on the AV IRWMP Section 3
    - Explain what assumptions were made, indicate what data was used, explain method and conclusions
    - Compare to what was done in other similar reports
  - Identify areas of agreement by water budget component where they exist
  - Identify areas of disagreement by water budget component if needed
  - Explore options to reach broad agreement regarding how to proceed with the IRWMP
- Prepare recommendations for the larger Stakeholder group
