AV IRWMP Ninth Stakeholder Meeting
Wednesday, July 17, 2013

Minutes taken by: Brenda Ponton

The Ninth Antelope Valley Integrated Regional Water Management Plan (IRWMP) 2007 Update Stakeholder meeting was held from 9-11 am on July 17, 2013, at the Lancaster City Hall EOC Room.

1. Welcome and Introductions
    a. The meeting was opened and led by Brian Dietrick (RMC) and called to order at 9:05 am
    b. An electronic copy of the PowerPoint presentations and sign-in sheet are attached
2. Outreach – Alfalfa Festival/AV Fair
    a. Vicki Medina explained if the AV IRWMP would like to be represented at the festival with a booth, it would cost $850 and would need a volunteer manning the booth all 10 days
    b. Alternatives to a booth at the festival were discussed
        - Examples: The Home and Garden Show in March; Farmer's Market; "Thursday Night on the Square" during the summer; a booth at the Water Park; the JetHawks Game (Water Awareness Month is in May)
        - Ideas should be sent to Vicki Medina: Vicki@avbot.org

3. IRWM Grants Update
    a. Prop 84 – Boron CSD Arsenic Management Feasibility Study & Well Design; draft recommendations from DWR expected in August 2013; Round 3 guidelines expected summer 2014 with applications due in fall 2014
    b. Prop. 1E – PWD Littlerock Dam Sediment Removal Project; Brian announced the project was not recommended for funding; project could be eligible for other funding opportunities

4. IRWM Plan Updates
    a. The Draft Plan will be complete by the beginning of October to leave time for the 30-day comment period and the 60-day review period
    b. Updates to Section 4 (Objectives) included recognizing the multiple benefits of flood waters (such as supply and water quality) and adding climate change language
        - Section 4 review team was Wanda D, Matt K, Bob L, Gene N, Dwayne C, Carlyle W
        - Brian explained comments will be available for review on an online FTP site at http://fileshare.rmc.com/ (Log-in name: avirwmp, Password: 2013update)
        - It was suggested to not include pumping capacity as an objective but instead as a component of how to achieve the objectives
        - Bob Large suggested including a 10-year drought scenario; this will be discussed further at the Sept. stakeholder meeting

- Adjudication was discussed – It was agreed that adjudication should be mentioned in the IRWMP update with a brief history, a status of what issues remain today, and how it will impact the IRWMP; it was agreed that it should be addressed briefly in the report and should include only the facts as reported by the court
- Bob L. commented on how there are several private wells in the Antelope Valley and asked how these will be accounted for; he said the combination of the private wells and septic systems make closed loop systems and wanted to know the impact on the broader area; Brian responded that the RMC team will examine the methods used to estimate private well production in the 2007 IRWMP and make appropriate revisions

c. Disadvantaged Communities Technical Memo (DAC TM)
- DAC TM review team is Bob L, Carlyle W, Kristi K, Wanda D
- The definition of what qualifies as a disadvantaged community was clarified as being a community with a mean income less than 80% of the state mean income
- DAC is not necessarily the same as a community on septic or a rural community

d. Section 2 (Regional Description)
- Section 2 review team is Rick C, Wanda D, Tom B, Matt K, Carlyle W
- Discussed adding Bob Large to the review team for the climate change section
- It was agreed that it would be beneficial to clarify that adjudication is not a part of the IRWMP but that it affects the supply situation in the AV in terms of the quantity of groundwater available
- It was agreed that the update should include a discussion of solar power – RMC should contact the large solar players: LA County, the School Districts, Kern County, Lancaster, and Palmdale (contact Mitch Glaser and Lorali)

5. <u>AVWATERPLAN.ORG updates</u>
   a. Aracely reviewed updates to the website: all projects can now be submitted and reviewed online; meetings will be posted on the calendar; projects can be exported for review; short forms collect the minimum information for each project and are used for summary spreadsheets
   b. LA Waterworks will be posting the revised project list on the website

6. <u>New IRWM Projects</u>
   a. Review and acceptance process
- New projects will be reviewed, evaluated, and prioritized by the A-Team and presented to the stakeholders for approval at Stakeholder Meetings before adding them to the 2013 IRWMP
- Projects will be evaluated based on the number of objectives and resource management strategies, technical feasibility, whether they address DAC/Tribal/Environmental Justice concerns, whether costs have been

evaluated, economic feasibility, readiness to proceed, and whether they address climate change issues

b. Acceptance of projects by the stakeholder group – the attached table indicates the new projects that have been submitted for acceptance; these projects were reviewed by the A-Team on July 9th and their recommendations are included in the table
    - Brian explained that projects were made from the following list of choices:
        - Accept as implementation project
        - Accept as study/report
        - Accept as conceptual project
        - Request additional info.
        - Reject
    - Stakeholder Discussion:
        - Proponents of conceptual projects should begin to think about the downstream benefits and how to quantify them
        - City of Palmdale's Lower Amargosa Creek Recharge Project (conceptual project) needs a benefit/cost estimate
        - LA County DPW needs to provide more info on how direct the connection is between the solar power and the wells (RMC will update this project to "Request Additional Info.")
        - North Edwards WD's Arsenic Contamination Project needs to clarify which of the 3 districts the project is in (change to "Request Additional Info.")
        - Rosamond CSD's Arsenic Remediation Project for the William Fisher Memorial Water Co. needs to provide more technical support and an economic feasibility study. GEI Consultants said they are conducting more technical studies and an economic feasibility analysis which will be complete in 18 months (or sooner). For now the project will remain as "Conceptual" on the project list; but the discussion of potentially updating the project to "Implementation" will be revisited at the Sept. stakeholder meeting

c. Project Prioritization
    - The ultimate goal is to establish high, medium, and low priority projects
    - Brian explained one potential scoring method, presented an example, and explained the RMC team will be adjusting the method as needed during the initial prioritization process; the objective is to keep the prioritization process as simple as possible while still making meaningful distinctions between projects
    - Projects with better technical justification or more evidence of benefits and relevance to the objectives will be preferred; DAC, Tribal, and Environmental Justice projects will be preferred; projects with higher benefit to cost ratios will be preferred; and projects closer to implementation will be preferred
    - The RMC team will be prioritizing the projects that are ready for implementation (marked as "Implementation" or "Study/Report" on the project

list), adjusting the scoring method as needed, and meeting with the A-team before the next stakeholder meeting to review and make recommendations on project prioritization

- The recommendations will be presented for stakeholder approval during the September Stakeholder Meeting

7. Next Steps
    a. New Projects – proponents can continue to submit new projects, the A-Team will have more recommendations in Sept., and a prioritized project list will be presented in Sept.
    b. IRWM Plan
        - Section 4 (Objectives) – comment matrix will be on the FTP site
        - Section 7 (Submittal, Eval., Prioritization) – review in July
        - Section 2 (Region Description) – review in August
    c. Flood
        - Next 3 TMs review in July
        - Comment matrices – FTP site
    d. DAC
        - Last DAC TM review in August
        - Comment matrices – FTP site
    e. A-Team meeting – early Sept.
    f. Stakeholder meeting – The next stakeholder meeting will be held Sept. 18th in the City of Palmdale (RMC to confirm location)

    g.

8. Meeting was adjourned at 11:05 am

ACTION ITEMS:

1. RMC to secure meeting space for next stakeholder meeting at the City of Palmdale
2. RMC to update project list and contact proponents for additional information where needed
3. RMC to execute project prioritization and present findings to A-Team at meeting in September
4. RMC to complete Section 2, Section 7, and DAC TM and upload to FTP site for review
5. RMC to upload comment matrices for Section 4 and Flood Management TMs to FTP site
6. RMC to contact Mitch Glaser and Loreli for reference documents about solar power in the Antelope Valley
7. LA Waterworks will update the website with the revised project list
8. Vicki M. and Rick C. to handle notifications for stakeholder meetings
9. Stakeholders to email Vicki Medina with ideas for public events to promote the AV IRWMP

New Projects to be Considered for Acceptance into AV IRWM Plan

Sponsor	General Information	Type	Action Taken*
Antelope Valley Duck Hunting	Multi-use/Wildlife Habitat Restoration Project	New project	C
AVEK	South Antelope Valley Intertie Project	New project	A
City of Lancaster	Whit Carter Park Recycled Water Conversion	New project	C
City of Lancaster	Division Street and Avenue H-8 Recycled Water Tank	New project	C
City of Lancaster	Lancaster National Soccer Center Recycled Water Conversion	New project	C
City of Lancaster	Pierre Bain Park Recycled Water Conversion	New project	C
City of Lancaster	Antelope Valley Recycled Water Master Plan	New project	B (study)
City of Palmdale	Lower Amargosa Creek Recharge Project	New project	C
EAFB	Antelope Valley Watershed Surface Flow Study	New project	B (study)
LACDPW	Little Rock Creek In-River Spreading Grounds	New project	C (need location)
LACDPW	Big Rock Creek In-River Spreading Grounds	New project	C (need location)
LACDPW	Solar Power System at K-8 Division	New project	~~C~~ D
LACDPW	Solar Power System at Avenue H & 20th St. West	New project	~~C~~ D
LACDPW	Solar Power System at Sewer Maintenance North Yard	New project	~~C~~ D
North Edwards WD	Arsenic Contamination Project	New project	~~C~~ D
North Edwards WD	Consolidation with North Edwards WD	New project	D
Palmdale Recycled Water Authority	Palmdale Recycled Water Authority – Phase 2 Distribution System	New project	A
Road Maintenance Division (LACDPW)	Flooding issues Avenue P-8, between 160th and 170th Street East	New project	D
Road Maintenance Division (LACDPW)	Flooding issues Avenue W, near 133rd Street East	New project	D
Road Maintenance Division (LACDPW)	Build a bridge at the existing dip crossing of Mt. Emma Road @ Littlerock Creek	New project	D
Rosamond CSD	Arsenic Remediation Project for the William Fisher Memorial Water Co.	New project	C
LACWD 40	Project Name: North Los Angeles/Kern County Regional Recycled Water Project - Phase 2	Project with revisions	A
LACWD 40	Project Name: North Los Angeles/Kern County Regional Recycled Water Project - Phase 3	Project with revisions	A
LACWD 40	Project Name: North Los Angeles/Kern County Regional Recycled Water Project - Phase 4	Old project with revisions	A

*Potential Actions:

A. Recommend acceptance as implementation project
B. Recommend acceptance as study/report
C. Recommend acceptance as conceptual project
D. Request additional info
E. Reject

Agenda

- Welcome and Introductions
- 2013 Alfalfa Festival
- IRWM Grant Updates
- IRWM Plan Sections and TMs
- Updates to Website
- New IRWM Projects
- Project Prioritization
- Next Steps

RMC

2013 Alfalfa Festival (AV Fair)

- Details from Vicki Medina
- Questions:
  - Should AV IRWM be represented?
  - What should our level of participation be?
  - Who can help with organization?

RMC

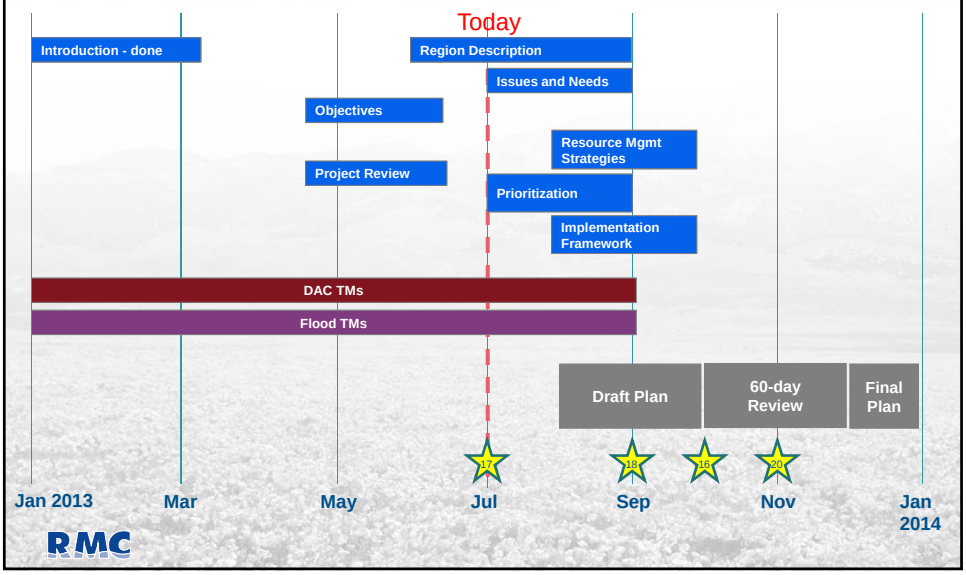
IRWM Grants Update

- **Prop. 84**
  - Round 2 – draft recommendations August 2013
  - Round 3 – guidelines expected summer 2014
- **Prop. 1E**
  - 31 applications received (over $200M requested)
  - $92M total awarded
  - DWR recommended 10 proposals for funding
  - Littlerock Creek Sediment Removal project was not recommended for funding

RMC

IRWMP Updates

Overall Schedule: Revisions + Review



RMC

Section 4: Objectives

- Purpose: Describe Region Objectives
- Significant Changes since 2007:
  - Recognize multiple benefits of flood waters
  - Added climate change language
- Section 4 review team: Wanda D, Matt K, Bob L, Gene N, Dwayne C, Carlyle W.
- Comment matrix will be available on FTP site:
  - http://fileshare.rmcwater.com/
  - Log-in name: avirwmp
  - Password: 2013update

RMC

Section 4 Comments

- Section 4 only defines the region objectives. It does not describe how they will be met. This will be handled in subsequent sections.
- 6-month disruption of supplies – there was a suggestion to specifically state that "pumping capacity" be named in the planning target
- Adjudication – suggest including footnote stating that this is a parallel process that will influence IRWMP when complete

RMC

DAC Water Supply, Quality and Flooding TM

- Purpose: describe the water-related issues in DAC areas within the Region
- Review Team: Bob Large, Carlyle Workman, Kristi Kennedy, Wanda Deal
- Comments:
  - "DAC" and "rural" overlap
  - Rural areas tend to have both high and low income households, which likely increases median household income
  - Example: Munz Ranch Road

RMC

Section 2: Regional Description

- Purpose: Describe the Region
- Major Changes:
  - Updates to supply and demand
  - Groundwater adjudication updates since 2007
  - Wastewater and flood control districts description
  - Climate change
- Review Team: Rick C, Wanda D, Tom B, Matt K, Carlyle W.

RMC

Section 2 Discussion Issues

- How should the adjudication be described?
  - Recommend re-stating adjudication is not a part of IRWMP (as previously discussed for Sec. 4)
  - Recommend including a write-up that describes what has happened in the first four phases
- Should language on solar and wind energy be added as part of the social values discussion?

RMC

Updates to AVWATERPLAN.org

- 5 MIN BREAK ☺
- LIVE DEMO

Projects

Master Project List (***PDF Format***)
AVIRWMP List of Proposed Projects by Category (***PDF Format***)

A critical component of the planning effort is identifying projects that would help achieve the goals and objectives of the IRWMP. To do this we encourage that you provide information on projects that could help achieve these goals especially projects that incorporate multiple water quality, water supply, flood management, data management, open space and recreation strategies.

To view, submit, edit or delete projects, you will need to register first. This can be done through the following link: http://www.ladpw.org/avwaterplan

Project Identification Short Form

Note: This one page project identification short form gathers the minimum amount of information required to submit a project for consideration in the IRWMP. More information may be required at a later time.

General Information (Red boxes indicate required fields)

Project Name:	Upper Amargosa Creek Recharge and Channelization Project
Project Sponsor(s):	City of Palmdale
Contact First Name:	Leon
Contact Last Name:	Swain
Phone:	661-267-5300
Email:	lswain@cityofpalmdale.org

Project Description, Location & Benefits

Project Description: (1-2 sentences)

Proposed project improvements include: expanding the size and capacity of the spreading ground of the natural recharge area; developing and preserving an ephemeral stream habitat; and channelization of Amargosa Creek (soft bottom) and providing a grade separation of 20th street west over Amargosa Creek. Project received $6.5M from Prop. 1e Round 1.

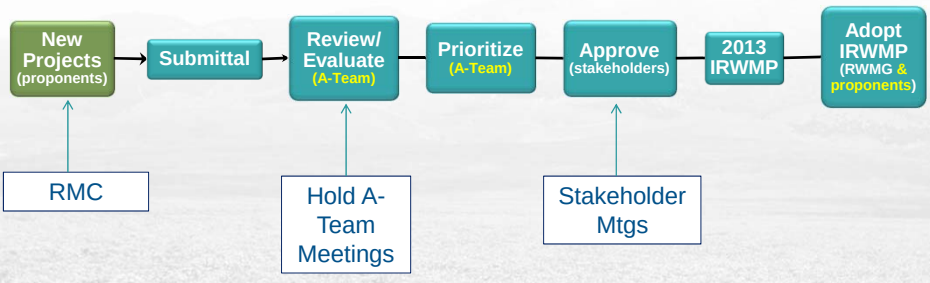
Discussion of New Projects

The Process



RMC

Discussion of New Projects

Review/Evaluation Criteria

Summary of Review Factor Criteria:

Review Factor	What the proponent needs to provide
General Information	Project description, location, benefits, and general information
IRWMP Objectives & Resource Mgt. Strat.	At least one of each?
Technically Feasible	At least one supporting document?
DAC/Tribal/Env. Justice	Yes or No?
Project Costs	Sufficient information? (for level of design)
Economic Feasibility	Has an analysis been done? (OK if not)
Readiness to Proceed	Is the status clearly defined?
Climate Change	Sufficient information?

RMC

Discussion of New Projects

Project List

- A-Team meeting was held on July 9th
- 21 new projects submitted
- Recommendations were made:
  A. Accept as an implementation project
  B. Accept as a study/report
  C. Accept as a conceptual project
  D. Request additional info.
  E. Reject
- One previous project with significant revisions
- Action needed from stakeholder group (see New Project List attached to meeting agenda)

RMC

Project Prioritization

- Prioritization method is needed to establish HIGH, MEDIUM, and LOW priority projects
- Part of Section 7 – Project Submittal, Evaluation, and Prioritization
- Must differentiate one project from another
- 2007 IRWMP used a complex scoring system
- Simplified scoring system (presented here) is one possible way to prioritize, based on new IRWMP guidelines
- Scores don't have to be the only consideration

RMC

Project Prioritization

Recommended Method

Review Factor	Prioritization Basis	How to score
Project Benefits	oHigher number of benefits oBetter technical justification	For each Benefit: 3 points = good justification 2 points = fair justification 1 point = minimal justification
IRWMP Objectives	oHigher number of objectives oBetter technical justification	For each Objective: 3 pts = good justification 2 pts = fair justification 1 pts = minimal justification
Resource Management Strategies (CWP 2009)	oHigher number of RMS's (DWR wants diversification)	For each RMS: 1 point
Technical Feasibility	ohigher number and quality of supporting documents ofewer data gaps	*N/A: Already captured under scoring for benefits and objectives*
DAC Benefits	oDAC benefits are provided	5 pts = yes 0 pts = no

RMC

Project Prioritization

Recommended Method

Review Factor	Prioritization Basis	How to score
Project Benefits	oHigher number of benefits oBetter technical justification	For each Benefit: 3 points = good justification 2 points = fair justification 1 point = minimal justification

EXAMPLE:
"ABC Water District Recharge Project"
Claimed benefits:

•Flood – detailed flood analysis	good	3 points
•Supply – detailed write up in 2010 UWMP	good	3 points
•Quality– based on similar projects	fair	2 points
•Recreation – short description provided	minimal	1 point
		9 points

RMC

Project Prioritization

Recommended Method

Review Factor	Prioritization Basis	How to score
Native American Tribal Community Benefits	oNATC benefits are provided	5 pts= yes 0 pts= no
Environmental Justice	oEJ concerns mitigated	5 pts= yes 0 pts= no
Project Costs and Financing	o*Not used*	*Not used*
Economic Feasibility	oHigher benefit to cost ratio, or high cost effectiveness	5 pts= highest 3 pts= medium 0 pts= lowest
Project Status (i.e. conceptual, design, ready for construction, CEQA)	olater stages of development	5 pts= Ready for Construction 3 pts= In CEQA Stage 1 pts= In Design 0 pts= Conceptual
Benefits to Multiple Stakeholders	omore easily integrated or that provide regional benefits	*N/A: Already captured under scoring for benefits and objectives*
Climate Change Adaptation/GHG Mitigation	ofacilitate climate change adaptation omitigate GHGs	*N/A: Already captured under scoring for benefits and objectives*

RMC

Next Steps

- **NEW Projects**
  - Submittal - proponents can continue
  - Evaluation - A-Team will have more recommendations in Sept.
  - Prioritization – also completed by A-Team in Sept.
- **IRWM Plan**
  - Section 4 (Objectives) – comment matrix will be on FTP site
  - Section 7 (Submittal, Eval., Prioritization) – review in July
  - Section 2 (Region Description) – review in August
- **Flood**
  - Next three TMs review in July
  - Comment matrices - FTP site
- **DAC**
  - Last DAC TM review in August
  - Comment matrix - FTP site
- **A-Team meeting** – early Sept.
- **Stakeholder meeting** – Sept. 18th (City of Palmdale?)
