

Salt/Nutrient Management Planning Stakeholder Meeting

The State Water Resources Control Board has recently adopted a Recycled Water Policy that addresses the concern for protecting the quality of California's groundwater basins. In response to this Policy, Los Angeles County Waterworks Districts and Sanitation Districts of Los Angeles County have initiated efforts to develop a regional salt and nutrient management plan for the Antelope Valley. A "Salt/Nutrient Management Planning Stakeholder Meeting" will be held to raise awareness and engage stakeholders and other interested parties on salinity and nutrient issues and management plan development efforts in the Antelope Valley region. This meeting is open to the public and is geared toward water, groundwater, and wastewater agency representatives, regulators, and community stakeholders.

Date/Time: Wednesday, August 19, 2009 at 11:30 am

Location: Lancaster City Hall – City Council Chambers
44933 Fern Avenue, Lancaster, CA 93534

Meeting Agenda:

- * Overview of State Recycled Water Policy
- * Components of a Salt Management Plan
- * Salt Management Planning Definitions
- * Data Collection and Assessment
