

LA County Public Works MicroStation Line Styles

Physical Line Styles

- lacpw_linestyle_main.rsc
- lacpw_linestyle_walls.rsc
- lacpw_linestyle_traffic.rsc

Cosmetic Line Styles (use annotation scale ON in MicroStation)

- lacpw_linestyle_utility.rsc
- lacpw_linesytle_cosmetic.rsc

Location of files used to develop these line styles: P:\itpub\Cadlib\CADD-GIS_GROUP\CADD_Group\Projects\MicroStation Linestyles

Using Utility Line Styles

This guide will help you understand how to setup your model and referencing properties to properly display the utility line styles. In the example below the Design Model properties is configured for cosmetic line styles (annotation scale), setting the line style scale factor, and configuring the reference settings of a Sheet Model.

Design Model

Set the annotation scale to the scale used to reference the Design Model into the Sheet Model (e.g. 1"-40').

Then set the *Line Style Scale* to *Annotation Scale*.

Line Style scale factor when drawing using Utility Levels is unchecked (or set to a value of 1).

Sheet Model

When referencing a Design Model containing cosmetic line styles to a Sheet Model:
