**CONSOLIDATED SEWER MAINTENANCE DISTRICT
CONDITION ASSESSMENT PROGRAM REPORT
UNINCORPORATED COUNTY**

This memo is to inform you that Los Angeles County Public Works Consolidated Sewer Maintenance District (District) has completed a Sewer Condition Assessment Program of a portion of the unincorporated County's sewer system maintained by the District's East Yard.

The enclosed Condition Assessment Report provides details regarding the maintenance and structural condition of your City's sewer mainlines. This information should be included in the District's Sewer System Management Plan as a reference in Chapter 8, System Evaluation and Capacity Assurance Plan. The segments with critical maintenance issues have been cleaned and, where appropriate, incorporated into our enhanced maintenance cleaning schedule for continued monitoring. In addition, the segments with severe structural defects have either been repaired or will be scheduled for repair or replacement as part of the ongoing Accumulative Capital Outlay Project.

**CONDITION ASSESSMENT REPORT
LOS ANGELES COUNTY PUBLIC WORKS
CONSOLIDATED SEWER MAINTENANCE DISTRICT**

PROJECT NAME:	Y0TV1112B	PROJECT MGR:	Hanna Kebede
PROJECT DATE:	3/13/12	CONTACT NO:	(626) 300-4686
SUP. DISTRICT(s):	1 & 5	MAP PAGE(S):	1961, 1963, 2014, 2015, 2016, 2017, 2018, 2069, 2070, 2166, 2167, 2170, 2216, 2217, 2259, 2260, 2342, 2343, 2386
Report By:	Clement Khong	Report Date:	1/7/19

INTRODUCTION

As part of the Sewer Condition Assessment Program, the Los Angeles County Public Works Consolidated Sewer Maintenance District (District) has completed the condition assessment of 766,612 feet or 21.0 percent of the unincorporated County's sewer system maintained by the District's East Yard.

The enclosed Condition Assessment Report outlines the structural and maintenance ratings of our system based on the Pipeline Assessment and Certification Program's (PACP) (Version 6.0.1) rating methodology. Included in the report are the following:

- Project Overview Map (Enclosure 1)
- Quick Maintenance Rating Map, High Water Levels List and Map (Enclosure 2)
- Quick Structural Rating Report Priority List and Quick Structural Rating Map (Enclosure 3)

The District has now completed the condition assessment of 1,914,180 feet of the unincorporated County's sewer system maintained by the District's East Yard. Previous Condition Assessment Reports dated April 6, 2009, May 28, 2009, October 8, 2009, January 5, 2011, May 20, 2011, June 20, 2013, November 18, 2016, and November 28, 2016 have been provided to you. A copy of the reports can also be found in the District's website at <http://dpw.lacounty.gov/smd/cctv/city/>.

The Sewer Condition Assessment Program utilizes the PACP Quick Rating methodology to rank the structural and maintenance condition of your system based on industry standards.

PROJECT AREA AND DESCRIPTION

Project No. Y0TV1112B included sewer lines located in the unincorporated Los Angeles County and the Cities of Industry, Duarte, Temple City, San Dimas, La Cañada Flintridge, and Bradbury. Enclosed for your reference is an overview map of the project area within the unincorporated County (Enclosure 1).

DEFECT GRADE DESCRIPTION

The Quick Rating indicates the number of occurrences for the highest severity grade for each pipe segment for either maintenance or structural defects. A grade of 1 indicates that a pipe segment is in excellent condition with minor defects while a grade of 5 indicates that a pipe segment may require immediate attention. A legend of the five possible defect grades is as follows:

Grade	Defect Grade Description
1:	MINOR
2:	MINOR TO MODERATE
3:	MODERATE
4:	SIGNIFICANT
5:	MOST SIGNIFICANT

MAINTENANCE REPORT

Our inspection revealed that approximately 72.0 percent of the system televised in unincorporated County as part of Project No. Y0TV1112B was free of significant blockages or restrictions that would impede sewer flows. However, the remaining 28.0 percent of the pipe segments within the unincorporated County had a PACP maintenance grade of 3, 4, or 5 as indicated in the Quick Maintenance Rating Table shown below. These segments have been incorporated into our routine cleaning schedule with corrective action taken.

A color-coded map showing the quick maintenance rating for each pipe segment is provided in Enclosure 2.

QUICK MAINTENANCE RATING TABLE

DEFECT GRADE	PIPE LENGTH (FT)	PERCENT OF TOTAL INSPECTED PIPE LENGTH	NO. OF SEGMENTS
1: Minor	383,040	50.0	1,644
2: Minor to Moderate	168,829	22.0	683
3: Moderate	114,972	15.0	441
4: Significant	92,699	12.1	355
5: Most Significant	7,072	0.9	36
TOTAL	766,612	100.0	3,159

High Water Levels

Our inspection revealed that approximately 99.0 percent of the system televised has adequate capacity. Approximately 1.0 percent of the segments inspected exhibited visual signs associated with high water levels. The capacity of the sewer pipe can be determined by analyzing several PACP codes, including Water Level, Water Mark, and miscellaneous remarks, which indicate the camera was underwater or there were sags in the line. A sewer pipe is considered at capacity when 50 percent of the diameter of the sewer pipe is full of water. However, there are conditions in which the Water Level or Water Mark has reached 50 percent or greater due to heavy flows in adjoining pipes, a temporary stoppage caused by debris in the sewer lines, or a sag in the line. Therefore, additional review of these pipe segments was conducted to determine if any capacity issues exist.

All sewer pipes where the Water Level, Water Mark, and miscellaneous remarks of camera underwater or sags in the line are at or above 50 percent capacity have been listed and analyzed on the High Water Level Table in Enclosure 2. The nature of these high water level conditions is also summarized on this table.

A map showing the sewer lines with high water levels is provided in Enclosure 2.

Infiltration

Our inspection revealed that infiltration was not detected in any pipe segments in the unincorporated County's system.

STRUCTURAL REPORT

Our inspection revealed that approximately 76.0 percent of the inspected pipe segments within the unincorporated County were free of severe structural defects. However, the remaining 24.0 percent of the inspected pipe segments had a PACP structural grade of 4 or 5 as indicated in the Quick Structural Rating Table shown below. These segments have been placed on a priority list based on the severity and the need for action. For items 1 through 772 in the Quick Structural Rating Report Priority List (Enclosure 3), which

warrant a corrective action, the proposed corrective action will be programmed in the next 24 months as part of the ongoing Accumulative Capital Outlay Program.

A color-coded map showing the Quick Structural Rating for each pipe segment is located in Enclosure 3.

QUICK STRUCTURAL RATING TABLE

DEFECT GRADE	PIPE LENGTH (FT)	PERCENT OF TOTAL INSPECTED PIPE LENGTH	NO. OF SEGMENTS
1: Minor	193,433	25.2	934
2: Minor to Moderate	39,220	5.1	169
3: Moderate	349,905	45.7	1,284
4: Significant	139,533	18.2	583
5: Most Significant	44,521	5.8	189
TOTAL	766,612	100.0	3,159

CONDITION ASSESSMENT PROJECTS

The Sewer Condition Assessment Program performed the condition assessment of the sewer lines within the unincorporated County maintained by the East Yard according to the following schedule:

FISCAL YEAR	PROJECT NAME	LENGTH (FT)	PERCENTAGE OF SYSTEM	STATUS
2005-06	Y0TV0506D	49,010	1.4	COMPLETED
2005-06	Y0TV0506E	159,252	4.4	COMPLETED
2007-08	Y0TV0708E	2,354	0.1	COMPLETED
2007-08	Y0TV0708F	195,437	5.5	COMPLETED
2008-09	Y0TV0809A	213,884	6.0	COMPLETED
2008-09	Y0TV0809C	301,513	8.4	COMPLETED
2009-10	Y0TV0910B	1,675	0.1	COMPLETED
2009-10	Y0TV0910C	224,433	6.3	COMPLETED
2010-11	Y0TV1011A	498,902	13.9	REPORT IN PROGRESS
2011-12	Y0TV1112B	766,612	21.2	COMPLETED
2013-14	Y0TV1314B1	291,751	8.1	REPORT IN PROGRESS

*Structural deficiencies are categorized into groups of defects or observations with a wide range of severity. Each of these deficiencies received additional post inspection review and some of these were determined not likely to interfere with the normal operation of the sewer line due to the severity, size, and/or location of the deficiency. These segments will be reviewed during the next cycle of CCTV inspections.

*Structural deficiencies are categorized into groups of defects or observations with a wide range of severity. Each of these deficiencies received additional post inspection review and some of these were determined not likely to interfere with the normal operation of the sewer line due to the severity, size, and/or location of the deficiency. These segments will be reviewed during the next cycle of CCTV inspections.

*Structural deficiencies are categorized into groups of defects or observations with a wide range of severity. Each of these deficiencies received additional post inspection review and some of these were determined not likely to interfere with the normal operation of the sewer line due to the severity, size, and/or location of the deficiency. These segments will be reviewed during the next cycle of CCTV inspections.

*Structural deficiencies are categorized into groups of defects or observations with a wide range of severity. Each of these deficiencies received additional post inspection review and some of these were determined not likely to interfere with the normal operation of the sewer line due to the severity, size, and/or location of the deficiency. These segments will be reviewed during the next cycle of CCTV inspections.
