

Survey Map Checking Fees Not Charged

In conformance with California Government Code Section 6103, fees will not be charged on survey map checks for public agencies. Consultants acting on behalf of public agencies are considered to stand in their shoes for purposes of said code; therefore, survey map check fees will not be charged to consultants working for the public agencies, provided the public agency provides a written request on a project-by-project basis or if the survey maps are submitted through the agency. If no request is received, then prevailing fees will be charged.
