COLIMA #2-345
TRACT

Testimony of W.R. REYNOLDS assigned as AMENDMENTS TO PROPOSED STATEMENT on motion for new trial (S.C.NR.4367) § 1000. I have been advised by Santa Gertrudis and Colima Grants so far as they relate to the Bouchard tract. The line AB is not the true boundary between the Santa Gertrudis and Colima Grants according to their survey, but it is the line which was adopted by the parties in making their partition. (ie. it will not fence), and the line adopted by the parties in making their partition does not correspond with the true boundary. The portion of the partition line very close to my survey at the Colima Grant is very close to the line AB. The line of willows along the disputed premises would be mainly in the Aguirre tract but I am not certain that the portion on partition according to my survey at the Colima Grant is the same as the portion on partition according to my survey at the Santa Gertrudis tract. The Colima Grant for more than 20 years since before 1898, and have always understood that the Bouchard tract was possession and claiming up to the line AB.
