

RANCHO TOPANGA MALIBU SEQUIT,

Particularly that part of the Rancho between its north boundary and the centerline of the State Highway lying west of Lot 1, as compiled from data as explained below. This map combines surveys of Lots 2, 8 and 20 with the alignment data shown on the centerline of the State Highway as per ~~C.S.B. 1236~~ and the data shown covering the north boundary and the west boundary of the Rancho as per C.S.B. 1236.

The surveys of Lots 2, 8 and 20 were used to determine the relation between the bearings of the Highway survey and the bearings in above mentioned County survey; also for making calculated closures of the several figures bounded by these lot lines, the Rancho lines and the Highway centerline.

Certain adjustments being indicated were made as follows:

- 1 The angle at T.M.*11 was adjusted 0°00'42" and the length of the course from T.M.*11 to T.M.*14 shortened 0.19 feet,
- 2 No adjustment between T.M.*11 and T.M.*10.
- 3 A bearing adjustment of 0°00'38" and distance adjustment of 100.034+ on C.S. 1236 = 100.00 on this map from T.M.*10 to T.M.*8,
- 4 A distance adjustment of 100.023+ on C.S.B. 1236 = 100.00 on this map from T.M.*8 to T.M.*4,
- 5 A bearing adjustment of 0°00'28" from T.M.*6 to T.M.*4,

The dividing lines of Lots 2 to 23 were then set along the north Rancho line by proportioning between the adjusted distances and the distances shown on a map filed as C.P. 534, Records of Los Angeles County, and said lot lines, excepting Lot 2, were produced southerly using the bearings marked on said Map C.P. 534 but with the same basis of bearings as the Highway survey. R.F.

The easterly and westerly lines of Lot 2 were arbitrarily located and set on the ground and do not conform to C.P. 534. The other lot lines as established would conform only approximately with the lot lines of C.P. 534 due to a different base of bearings and to distance adjustments. R.F.
