Land mountainous. Soil 2nd rate.
Timber and undergrowth of Oak and Chaparral.
JUNE 2nd, 1880.

The land that I have surveyed in this Township is generally mountainous. The Soil 1st and 2nd rate. Timber and undergrowth consists principally of Oak and Chaparral. The Canada Les Alamas, has fertile soil well watered and furnishes good grazing land. There is also a fair proportion of agricultural land in parts surveyed. A few settlers are engaged in stock raising and cultivating portions of the valleys. That part of the Tp. I did not survey consists of rough broken mountains devoid of valuable timber with soil unfit for cultivation.
