Timber & undergrowth of Oak & Chaparral.

May 5th, 1850

GENERAL DESCRIPTION

The land in this township is generally mountainous; the soil is 1st & 2nd rate. Water and timber in abundance, the latter consisting chiefly of Oak with undergrowth of Chaparral.

There is a fair proportion of good grazing and agricultural lands in the Township, it being well watered by Peru and Castagne Creeks. There are several settlers in the Township engaged in stock raising and general farming.
