GENERAL DESCRIPTION

The two south rows of sections in this township are mostly mountainous with numerous canyons draining to the north.

A small part of secs. 35 and 36 drains to the south.

The soil is generally sand and gravel, 2nd, 3rd and 4th rate. Most of the land has a scattering growth of pine, oak and juniper timber, and an undergrowth of sage, chapparal and manzanita. Alvin Bemis has a house and 10 acres of land under cultivation in sec. 32. Edwin Bemis has a house and a small clearing in sec. 30. Harry W. Roche has a house in sec. 33. Walker Jones and Shirley Neild have houses and clearings in sec. 26. The Johnson Bros. have built an earthen dam across Horse Canyon in sec. 35 for the purpose of storing flood water for irrigation purposes. A ditch leads to the reservoir from Sheep Creek Canyon, and a concrete pipe is being laid from the reservoir to the farm lands to the north. The only running water in this township is just below the snow line, except a spring in Sec. 35 that supplies the ranchers with water for household purposes.
