#### General Description

The valuable portion of this township having already been surveyed, I only added a little to include settlers engaged in the manufacture of honey and to connect the section line with the lines of Rancho "Addition to San Jose as just surveyed by me. The northern portion of the Township lies in exceeding rough rocky mountains, having no agricultural value, as they are dry, rocky and very abrupt, and in many places, utterly impassable. I know of no mineral lands in the Township. The timber is confined to the portion before surveyed, except a little in the narrow canons, but my lines have included everything that is worth having, water is scarce.

Very respectfully,

M. G. Wheeler  
Dep. U.S. Surveyor.
