This is all the land in this Tp. worth subdividing.

---

General Description

There is a fair proportion of timber in this Tp. chiefly in the canadas and along the high range of mountains between waters of the Tajunga and San Gabriel Rivers.

There is some good grazing in canadas and the land is chiefly valuable for timber.

The country is especially rough and expensive to build roads.

Water is scarce except in the main branches of the Tajunga and San Gabriel Rivers.
