

Storm Debris Removal at Devils Gate Reservoir

MAINTENANCE ACTIVITY Los Angeles County Public Works is removing recent storm debris from Devils Gate Reservoir. This is routine facility maintenance and not part of the Devils Gate Reservoir Restoration Project. The debris removal is necessary to safeguard downstream communities by maintaining operability of Devils Gate Dam and maximize storage capacity in the reservoir. Once removed, this debris will be transported to Scholl Canyon Landfill in the City of Glendale.

DATE/TIME County crews will begin hauling on Wednesday, February 20, 2019. Hauling operations will be limited to 7:00 a.m. to 3:30 p.m., Monday through Friday, for approximately 2 weeks. Additional debris removal work inside the reservoir may take place on weekends.

RESIDENT SUPPORT LA County appreciates your patience and understanding during storm season. If you have questions about maintenance activities or would like to report a concern, contact Public Works Dispatch at (800) 675-HELP (4357).
