## State Water Resources Control Board

APR 24 2017

Mr. Mark A. Lambos  
Los Angeles County Department of Public Works  
900 South Fremont Avenue  
Alhambra, CA 91803-1331

**SUBJECT: Proposition 1 (Prop 1) Storm Water Grant Funding Award – Storm Water Resource Plan (SWRP) Concurrence Letter**

Dear Mr. Lambos:

Thank you for submitting the Los Angeles County Flood Control District's (LACFCD) functionally equivalent SWRP and the completed Self-Certification Checklist (Checklist) to the State Water Resources Control Board (State Water Board), Division of Financial Assistance (DFA). This letter addresses the SWRP and Checklist submitted for the Prop 1 Storm Water Grant Program (SWGPP) Round 1 Implementation application East Los Angeles Sustainable Median Stormwater Capture Project (PIN 36308) awarded on December 15, 2016.

State Water Board staff completed a review of the Checklist and referenced pages provided with the SWRP. State Water Board staff concur that the SWRP and Checklist demonstrate that the LACFCD's functionally equivalent SWRP is consistent with the minimum requirements of the California Water Code (Water Code) sections 10561-10573 and the corresponding mandatory requirements in the State Water Board's SWRP Guidelines<sup>1</sup>. By this concurrence, the LACFCD and other eligible entities are eligible to receive funding from a bond act approved by voters after January 1, 2014 for storm water and dry weather runoff capture projects included in the Enhanced Watershed Management Plan (EWMP) for the Upper Los Angeles River Watershed planning area.

State Water Board staff's review was for funding eligibility related to a bond act only. The review of the submitted SWRP and Checklist does not include a technical evaluation or analysis of the SWRP or any supporting documents, and this letter provides no approval of these documents.

---

<sup>1</sup> This concurrence letter does not address whether the functionally equivalent SWRP is consistent with all of the non-mandatory recommendations in the SWRP Guidelines.

Mr. Mark A. Lambos  
Department of Public Works

- 2 -

Please do not hesitate to contact Harish Bagha at (916) 341-5716 should you have any additional questions.

Sincerely,

Leslie S. Laudon, Deputy Director  
Division of Financial Assistance

# Appendix A: Checklist and Self-Certification

## Checklist Instructions:

For **each element** listed below, review the applicable section in the Storm Water Resource Plan Guidelines and enter ALL of the following information.

A. Does the Storm Water Resource, or functional equivalent Plan meet the provision (Y/N)? B. Under **References**, enter:

1. Document name (or document(s)) that contain the requested information;
2. The chapter/section, **and page number(s)** where the information is located within the document(s);
3. The entity(ies) that prepared the document(s);
4. The date the document(s) was prepared, as well as any updates; and
5. Where each document can be accessed<sup>1</sup> (website address or attached).

<b>STORM WATER RESOURCE PLAN CHECKLIST AND SELF-CERTIFICATION</b>		
Mandatory Required Elements per California Water Code are Shaded

## **SUMMARY OF THE FUNCTIONALLY EQUIVALENT STORMWATER RESOURCE PLAN FOR THE UPPER LOS ANGELES RIVER ENHANCED WATERSHED MANAGEMENT PROGRAM**

Consistent with the State Water Resources Control Board's guiding principles that view storm water and dry weather runoff as a resource and as required by SB985, the State Board adopted Guidelines for public agencies preparing Storm Water Resource Plans (SWRP) as a condition of receiving State bond funds for stormwater and dry weather capture projects. The Los Angeles region has an existing Integrated Regional Water Management (IRWM) Plan that has been expanded to meet the State's requirement for a SWRP by incorporating the Enhanced Watershed Management Programs (EWMPs), Watershed Management Programs (WMPs), Coordinated Integrated Monitoring Programs (CIMPs), and Program Environmental Impact Report (PEIR).

### **Integrated Regional Water Management Plan**

This IRWM Plan was developed by the Greater Los Angeles County (GLAC) IRWM group and is a collaborative effort to identify and implement water management solutions on a regional scale that increase regional self-reliance, reduce conflict, and manage water to concurrently achieve social, environmental, and economic objectives on a regional scale. IRWM crosses jurisdictional, watershed, and political boundaries; involves multiple agencies, stakeholders, individuals, and groups; and attempts to address the issues and differing perspectives of all the entities involved through mutually beneficial solutions.

The GLAC IRWM Group approved its most recent IRWM Plan in 2014 following a multi-year effort among water retailers, wastewater agencies, stormwater and flood managers, watershed groups, the business community, tribes, agriculture, and non-profit stakeholders.

The IRWM Plan provided a mechanism for: 1) coordinating, refining, and integrating existing planning efforts within a comprehensive, regional context; 2) identifying specific regional and watershed-based priorities for implementation projects; and 3) providing funding support for the plans, programs, projects, and priorities of existing agencies and stakeholders.

To address all requirements for the SWRP, the GLAC IRWM Plan has begun incorporating additional regional planning and monitoring efforts focused on storm water quality into its Plan as attachments. These planning and monitoring efforts are the EWMPs, WMPs, and CIMPs developed by municipalities in 2014-16 to address their compliance with the Los Angeles Regional Water Quality Control Board's 2012 National Pollution Discharge Elimination System Municipal Separate Storm Sewer System Permit (MS4 Permit).

## **Enhanced Watershed Management Programs and Watershed Management Programs**

There are 19 EWMP and WMP groups comprised of the County of Los Angeles (unincorporated County), Los Angeles County Flood Control District (LACFCD) and cities with shared subwatersheds and water quality standards regulated by the Federal and State government. In addition, three cities opted to prepare individual WMP plans for their cities. The EWMP and WMP Plans provide detailed and computer-modeled strategies to address all dry weather and storm water pollutants.

The attached map shows the five subregions that comprise the GLAC IRWM region and the 19 EWMP and WMP groups. The boundaries of the IRWM subregions and the EWMP and WMP groups differ. The IRWMP boundaries were based on joining subwatersheds that were within close proximity to one another without regard to boundaries. On the other hand, the EWMP and WMP boundaries formed based on agency partnership agreements based on compliance with the MS4 Permit. At the time the EWMP and WMP groups were forming, they generally worked independently from each other and from the IRWM group.

Once the EWMP and WMP plans were approved, it became apparent that the GLAC IRWM offered a successful framework for reaching stakeholders and the public in implementing the programs and projects in the plans. The outreach efforts for implementation of the EWMP and WMP plans will be folded into the GLAC IRWM efforts where the boundaries align. For EWMP or WMP areas outside the GLAC IRWM boundaries, other regional efforts will be utilized by including the EWMP and WMP plans under the "umbrella" of the GLAC IRWM Plan, the region will be able to have a unified approach in engaging the public in developing water projects for water quality, water supply, habitat, and recreation. The stakeholder outreach can be managed collectively, which allows for efficiency, clarity, and consistency and avoids redundancy.

## **Coordinated Integrated Monitoring Programs**

The 19 EWMP and WMP groups also developed CIMP plans to establish monitoring locations and monitoring frequency to:

- Assess the chemical, physical, and biological impacts of discharges from the MS4 Permit on receiving waters.
- Assess compliance with receiving water limitations and water quality-based effluent limitations established to implement Total Maximum Daily Load wet weather and dry weather wasteload allocations.
- Characterize pollutant loads in MS4 Permit discharges.
- Identify sources of pollutants in MS4 Permit discharges.

- Measure and improve the effectiveness of pollutant controls implemented under the MS4 Permit.

## **Program Environmental Impact Report**

The LACFCD, as a regional agency, is a member in 18 of the 19 EWMP and WMP groups and has been working with the applicable permittees as an equal partner to identify the types and locations of Best Management Practices needed to achieve permit compliance within each watershed. In addition, the LACFCD recognized that implementation of the EWMPs and WMPs may potentially result in changes to environmental conditions. As a result, the LACFCD prepared the PEIR in compliance with the California Environmental Quality Act to provide the public and responsible agencies with information regarding the potential effects on the local and regional environment associated with implementation of the EWMPs and WMPs. The PEIR was submitted to the County of Los Angeles Board of Supervisors and approved in May 2015.

## **Upper Los Angeles River Enhanced Watershed Management Program Group**

The enclosed SWRP Checklist and Self-Certification is specifically for the Upper Los Angeles River EWMP group, which is identified as number 2 on the map. This group is comprised of the Cities of Alhambra, Burbank, Calabasas, Glendale, Hidden Hills, La Cañada Flintridge, Los Angeles, Montebello, Monterey Park, Pasadena, Rosemead, San Fernando, San Gabriel, San Marino, South El Monte, South Pasadena, and Temple City, unincorporated County, and the LACFCD.

## **Stakeholder Engagement**

The GLAC IRWM Group has recurring monthly meetings with stakeholders to discuss regional collaborative efforts, such as those detailed in EWMPs. The GLAC IRWM Governance Structure creates a platform for water agencies, municipalities, NGOs, and other stakeholder groups to discuss stormwater issues. Five Subregional Steering Committees offer an opportunity for local outreach efforts to increase public understanding of water management issues, such as the requirements of the storm water permit.

The GLAC IRWM includes a Steering Committee dedicated to facilitating and supporting efforts to provide outreach activities to Disadvantaged Communities (DAC). Previous outreach activities include the 2010 GLAC DAC Outreach Evaluation Program, which was led by the Council for Watershed Health with support from the US Army Corp of Engineers. This 3 year effort involved working with five disadvantaged communities to engage them in the IRWM process. Additionally, in 2011 the Rivers and Mountains Conservancy launched the Alcanza Outreach Project in two disadvantaged communities, which resulted in the development of project concepts.

A DAC Coordinator position was created to lead outreach efforts within the GLAC Region. In 2015 the DAC Coordinator led a Water Dialogue speaker series across Los Angeles to initiate discussions on water issues and to educate the public on water policy. The DAC Coordinator also played an active role in shaping legislation and the development of IRWM-related grant programs to maximize DAC priorities.

In 2016 the Department of Water Resources (DWR) issued a Request for Proposals for the Disadvantaged Communities Involvement Program (DACIP) to encourage increased DAC involvement in the IRWM process. The GLAC DAC Committee is now preparing a 3 year outreach plan with stakeholders. The grant funding of \$9.8 million to the Los Angeles-Ventura Funding Area will support expanding previous DAC outreach efforts. In October 2016 the GLAC DAC Committee completed community outreach efforts facilitated by local NGOs in four subregions, which surveyed and included DAC communities' priorities as part of the DACIP proposal. The DACIP Grant is scheduled to begin in fall 2017 to support widespread outreach for multiple activities including education, needs assessment, technical assistance, and project development.

Current GLAC IRWM outreach activities are announced on the LA Water Plan website ([lawaterplan.org](http://lawaterplan.org)). All GLAC IRWM meetings are open to the public and agendas and minutes are posted online. The following is the typical schedule for GLAC IRWM regular meetings:

- Leadership Committee: 4th Wednesday of the month - 9:30 a.m.
- Lower San Gabriel/Lower Los Angeles Rivers: 3rd Tuesday of the month - 1:30 p.m.
- North Santa Monica Bay: 3rd Tuesday of every other month - 9:00 a.m.
- South Bay: 1st Tuesday of the month - 2:00 p.m.
- Upper Los Angeles River: 4th Tuesday of the month - 1:30 p.m.
- Upper San Gabriel/Rio Hondo: 3rd Thursday of the month - 1:30 p.m.
- DAC: 2nd Tuesday of the month - 9:00 a.m. and 4th Wednesday of the month after Leadership Committee meeting

### **Upper Los Angeles River Enhanced Watershed Management Program Group - Stakeholder Outreach**

In addition to the GLAC IRWM outreach efforts, the participating agencies in the Upper Los Angeles River watershed have developed the following websites dedicated to stormwater quality to provide up-to-date information regarding watershed protection, the EWMP Plans, public involvement opportunities, and recent announcements; resources,

including maps and educational materials; Frequently Asked Questions; and contact information:

1. <https://dpw.lacounty.gov/wmd/irwmp/>
2. <https://dpw.lacounty.gov/lacfd/ewmppeir/>
3. <http://www.cleanLA.com>
4. <http://www.lastormwater.org>
5. <http://dpw.lacounty.gov/swq/>

As the EWMPs and WMPs are revised through an adaptive management process every 2 years, it will integrate recommendations developed through the public participation process occurring both at the regional level as led by GLAC IRWM and at the local level conducted by the EWMP agencies developing specific projects.

# EWMP/WMP Groups & Greater LA County IRWM Region

## WMP Groups:

- 3 - LA River Upper Reach 2
- 4 - Lower LA River
- 7 - East San Gabriel River
- 8 - Lower San Gabriel River
- 9 - Los Cerritos Channel
- 18 - Alamos Bay
- 19 - Santa Monica Bay Jurisdiction 7

-  National Forest Area
-  Individual WMP or Numerics
-  Greater LA County IRWM Subregions

## EWMP Groups:

- 1 - Upper Santa Clara River
- 2 - Upper Los Angeles River
- 5 - Rio Hondo/San Gabriel River
- 6 - Upper San Gabriel River
- 10 - Malibu Creek
- 11 - Marina Del Rey
- 12 - North Santa Monica Bay
- 13 - Santa Monica Bay Jurisdictions 2 & 3
- 14 - Beach Cities
- 15 - Peninsula EWMP Agencies
- 16 - Ballona Creek
- 17 - Dominguez Channel
