### **Water records to be updated**

LANCASTER — Groundwater level records in the Antelope Valley will be updated and tracked under a joint agreement between Los Angeles County and the U.S. Geological Survey that county supervisors approved Tuesday.

Currently, the county waterworks district that serves part of the Antelope Valley does not have records for groundwater levels past 1995. The joint venture would update the records for the period 1996 to 2005. The USGS also will train county staff to monitor groundwater levels.

The estimated cost of the project is \$152,500.
