

Hello from the Los Angeles County Waterworks Districts. We are excited to introduce our new quarterly e-newsletter as another way of communicating important information with you. To unsubscribe from these updates, click [SafeUnsubscribe](#) at the end of this message.

[Drought is ON](#)

Due to severely dry conditions, Governor Brown has declared a **drought** emergency for California. The State Water Resources Control Board also issued new water conservation regulations restricting the use of potable water for certain outdoor activities. [Read More](#)

[Cloudy Water in Antelope Valley](#)

If you live in the Antelope Valley, you may notice a milky or cloudy appearance in your water. This is due to air bubbles in the water caused by operating ground water wells for longer periods of time to meet increasing demand and shortage of surface water. The air in the water presents NO health risks to customers. [Read More](#)

[Remove Grass, Receive Cash](#)

Los Angeles County Waterworks Districts is offering a cash rebate for removing grass and replacing it with water efficient landscaping. Save water and money. Apply for the Cash for Grass rebate today. [Read More](#)

[Summer Water Tips](#)

With summertime fast approaching, water usage levels are anticipated to reach high peaks during the hot sunny days. Beautiful lush lawns and pool parties are a staple of summertime fun but unfortunately also account for a high percentage of water consumption. Here are some water conservation tips to keep in mind for the summer. [Read More](#)
